

Navigator Outreach Toolkit

The Covered California 2022 Navigator Outreach map series is designed to be an interactive outreach map tool that displays Navigator locations with in-language speakers and potential opportunities of local drive time reach of dense populations of specific languages or ethnicities throughout the state.

The population data was extracted from the Census Bureau's 2020 decennial Census and the 2019 American Community Survey and is shown using a dot density symbology. The drive time reach of the Navigator locations was determined by using the locations as the central point with a drive time radius of 15 minutes.

Use this toolkit to access our maps that show the drive time reach for existing Navigator locations.

Navigator Drive Time Outreach Maps			
Resource	Type	Description	Updated
Hispanic – Latino Navigator Drive Time Reach Map	Story Map	Drive Time Reach map for the Hispanic/Latinx population showing Navigator physical locations that list a Spanish speaking enroller as on-site.	3/2/22
