

THINK DIFFERENTLY

When It Comes To Purchasing Health Coverage For Your Small Business Clients!

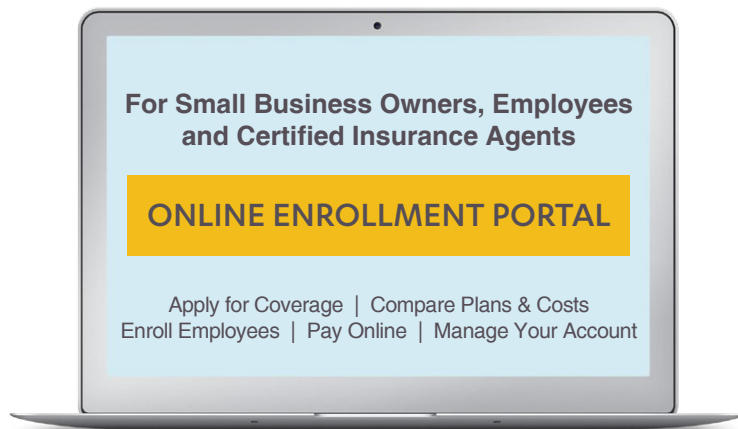

FOR **SMALL BUSINESS**

Covered California for Small Business (CCSB) is on a mission to make purchasing small group health coverage easier. No more chasing after low premiums or hearing your clients complain about their lack of coverage options. We give back the control, so purchasing health coverage is a win-win—cost controls for your clients with flexibility and coverage choices for their employees. It is a bold new way of thinking. It's Covered California for Small Business!

There is a new way to offer health coverage. CCSB helps your clients:

- Take **budget control** by deciding how much to contribute annually toward the cost of health coverage. Cost adjustments won't affect coverage choices and continuity of care for employees
- Present employees with a **choice of health plan options** from leading health insurance companies that include:
 - Statewide and regional HMO and PPO networks
 - Out-of-state access
 - Optional pediatric and dental coverage
- Manage and maintain their health coverage, open enrollment and account in real time using **CCSB's online enrollment portal**. Access the portal directly or through connectivity with other online platforms
- Allow employees to **make open enrollment choices online** and on their own schedule
- Offer **employee-only coverage**, helping dependents remain eligible for financial assistance with Covered California's health insurance marketplace
- Keep costs down with **no administrative fees** and access to **small business tax credits** (for qualified groups) only available through CCSB
