Outreach and Education Grant Program Award Recipients

August 20, 2013
Outreach and Education Grant Program

The following document profiles the 50 organizations that have received funding from Covered California's grant program for public education and outreach to consumers and small businesses.

Each profile contains a brief background on the organization, the communities they serve, the number of consumers or businesses they are targeting and the amount of the grant. For brevity, the summary does not include all the community events, health fairs, or other similar activities the grantees included in their proposals.

About Covered California

California was the first state to create a health benefit exchange following the passage of federal health care reform. Covered California is charged with creating a new insurance marketplace in which individuals and small businesses can get access to health insurance. With coverage starting in 2014, Covered California will help individuals compare and choose a health plan that works best for their health needs and budget. Financial help will be available from the federal government to help lower costs for people who qualify on a sliding scale. Small businesses will be able to purchase competitively priced health plans and offer their employees the ability to choose from an array of plans and may qualify for federal tax credits. Covered California is an independent part of the state government whose job is to make the new market work for California's consumers. It is overseen by a five-member board appointed by the Governor and Legislature.
