2. Introduction

Guided by its mission to improve the health of all Californians by assuring their access to affordable, high-quality care, Covered California aims to provide its enrolled members with the best selection of high quality and affordable health plans. To that end, Covered California performs a rigorous review of all facets of participating plans which includes close inspection of networks and providers.

Covered California also aims to provide an informative and transparent shopping experience via tools that enable members to make informed decisions about their healthcare including provider choice which relies on accurate provider information. Ensuring the accuracy of provider information has always been a priority for Covered California due to the implication inaccuracies have on consumer choice, continuity of care and accurate representation of the products sold on the Exchange. For these reasons, Covered California requires its participating and prospective Issuers to provide complete information on their provider networks monthly.

Covered California also recognizes the general need for more accurate provider data in California. Because Covered California has 85% of all licensed active physicians and over 90% of all general acute hospital's physicians in the state in one or more of its plans, its hope is to collaborate with all its participating Issuers, stakeholders, and partner agencies to improve the overall quality and accuracy of provider data in California.

Covered California's goal is to assist Issuers in targeting errors in their source systems and in improving the quality of provider data overall, not solely for products offered through Covered California. Therefore, Covered California has employed the services of a third-party contractor, Lexis Nexis (LN), to provide data validation, cleansing and consolidation services via their ProviderPoint Solution. LN will compare data submitted by Issuers to LN's proprietary Master Provider Referential database (MPRD) and conduct verification, de-duplication, correction, and augmentation of provider data.

Purpose of this Document

The provision of complete, accurate and up to date provider information supports Covered California in its role as an active purchaser on behalf of its enrollees and stakeholders. This document is intended to assist Issuers in generating a comprehensive useable file containing complete network information to fulfill the contractual monthly provider data submission requirement for Covered California. This document contains the data standards, data attributes, and specifications necessary for building the required file in the correct format. It also contains details on Covered California's effort to standardize and consolidate data from multiple Issuers into an online Multiplan Provider Directory. Specifically, this information supports:

- Covered California's online Multiplan Provider Directory
- Covered California's network analyses including assessment of Essential Community Provider networks and access to quality care in our most vulnerable communities
- Assessment of Issuer networks for certification and rate negotiation purposes
- Covered California's Enhanced Enterprise Analytics Solution

The 1st section of this document outlines Covered California’s general approach to data quality, the various ways this quality is assessed and how this assessment affects the monthly submission requirement and the online Multiplan Provider Directory display.

The 2nd section provides general guidance on generating and submitting the required monthly files including some general data concepts, file transmission rules, and communications.

The 3rd section details the data elements required in the file layout with the specific standards, authority sources, and business rules for populating each data element.

Intended Audience

This document was designed with the following program areas in mind under the assumption that these are the two main program areas involved in generating the submission file and ensuring the correct information is provided to Covered California.

- **Issuer Technical/IS Personnel:** Charged with extracting, formatting and organizing the data from source (or other) systems.
- **Issuer Business/Policy/Operations/Regulatory Personnel:** Charged with tracking and meeting business and regulatory requirements and understanding the business rules and policy decisions that went into structuring the specifications. Also, charged with verifying discrepancy reports.

Issuers seeking to apply for certification or current Covered California Issuers seeking to offer new products should refer to Appendix IV for instructions on how to submit a certification-specific network file and apply for a new network ID.

Supporting Documents

Covered California has compiled the following supporting documents to aid and support the completion of the provider data file submission. These documents can be found on the Covered California Extranet under “[Provider Directory Resources](#)”. Some documents are also posted to the [Covered California HBEX website](#) (noted below for applicable documents).

1. **Covered California Provider Point User Guide:** This document is intended to assist technical and non-technical personnel to navigate and make use of the feedback reports provided by LN to Issuers after every file submission.
2. **LexisNexis Data Dictionary:** This document includes many tabs with information relevant to the feedback reports Issuers receive from Covered California through LexisNexis.
 - a. Detail Error Report Layouts and Client Integration Codes: Multiple tables containing decodes and explanations to help navigate and make use of the detail discrepancy reports provided by Covered California as part of its accuracy check.
3. **Covered California Data Dictionary:** This document includes many tabs with tables, references, descriptions, and crosswalks. Of importance are the following tabs:
 - a. Covered California Provider Type – NUCC Specialty Taxonomy Crosswalk: A useful crosswalk of Provider Type, Specialty Taxonomy and Type of Service codes in addition to descriptions of every specialty, sub-specialty and classification. The list of

specialty taxonomy codes is issued and maintained by the [National Unified Claims Committee](#) and augmented by Covered California. This list is usually updated twice annually, in January and July of each year.

- b. Covered California Facility Reference List (OSHPD List): This list includes all facilities monitored by the Office of Statewide Health Planning and Development.
- c. ISO 639 – 2 & 3 Code list: Table of codes for most written languages.
4. **Covered California ECP reference list**: A single, non-duplicated list of Essential Community Providers (ECPs) that potentially could serve Covered California enrollees; the list is updated annually prior to the Covered California Application and Certification period. This can be found on the [Covered California HBEX website](#).
5. **Provider Data Submission Schedule**: Submission schedule for plan year (PY) 2025 includes “extract by” and “submit by” dates.

Questions on the information contained in this document should be directed to the following email address:

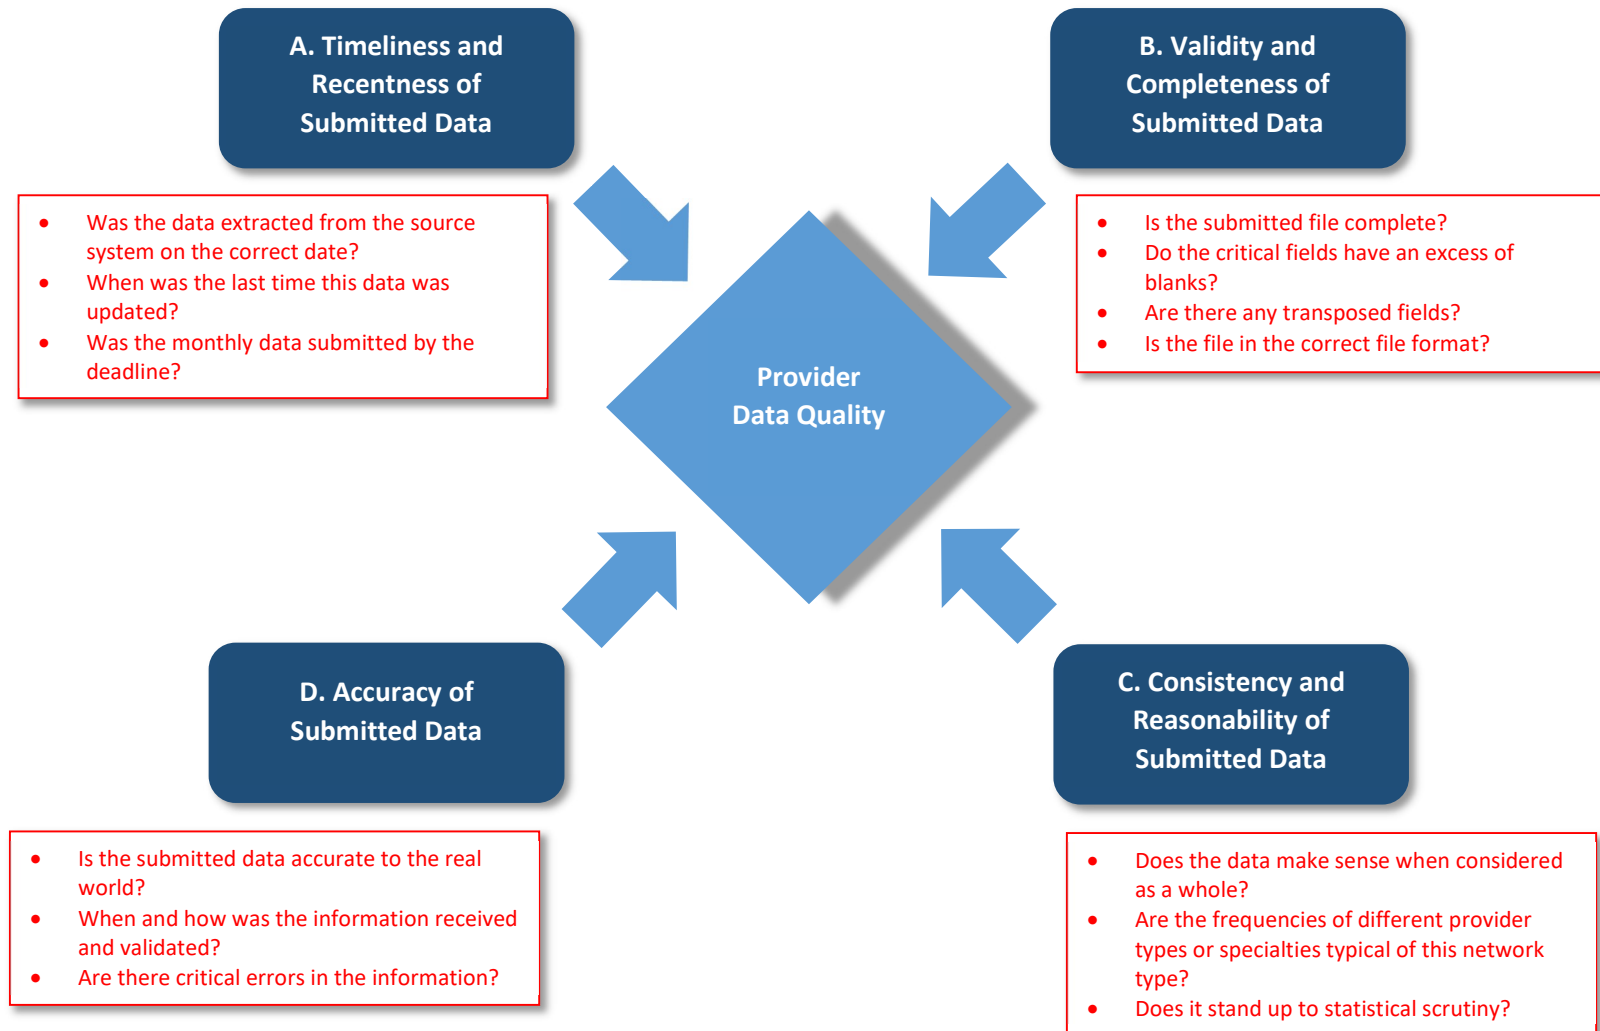

ProviderDirectory@covered.ca.gov

[Back to Contents](#)

3. General Approach to Provider Data Quality

Covered California attempts to assess the quality of Issuer supplied provider data in **four** main domains:

- A. Timeliness:** Timely Submission and Recentness of data
- B. Validity (Completeness):** Usability of the submitted file, Percentage of missing information in critical fields
- C. Consistency:** Reasonability of the data, zoomed out look at the data vs each individual element
- D. Accuracy:** How closely the data reflect the actual world

A. Timeliness:

- Covered California requires participating Issuers to submit provider data monthly per the Provider Data Submission Schedule described in the Supporting Documents section.
- Adherence to this schedule enables timely processing and display of provider data on the Covered California online Multiplan Provider Directory.
- This data should be “cut” or extracted no earlier than the last day of the preceding month to ensure a degree of freshness to the data.
- Covered California expects that Issuers ensure minimal time between receiving a reported change to a provider’s contract, location or demographics, and its eventual display on an online directory and submitted file as specified in CA Senate Bill 137.
- While Covered California does not have purview over the internal reporting and updating process, Covered California does track the timeliness of submitted files and posts this information as part of the Issuer’s final Plan Year performance. For details, please refer to section 1.11 of Attachment 3 of the QHP Model Contract available [here](#) and section 4.4.4 of the QHP Model Contract available [here](#).
- Covered California will consider a submission timely if the Issuer submits a valid file by end of day (EOD) on the predefined deadline. See below for details on how structural validity of files is assessed.

The monthly submission cycle through data cleansing and online display is detailed in Table 1 below for any typical month. Issuers must deposit the monthly submission file in the specified repository (see section on File Transmission for details) by EOD on the 7th business day of any given month (barring holidays and other events that occur on the 7th business day).

Business Day	Duration	Activity
Last Business Day of Prior Month	NA	QHP Issuer pulls provider data as of last day of month
1 – 7	7	QHP Issuer prepares Covered California Provider Data Submission File
7	NA	QHP Issuer submits Covered California Provider Data File to Issuer hosted SFTP by EOD on Day 7
8	1	LexisNexis conducts structural validation and uses last successful file (<3 months) for Issuer files that fail
9 – 12	4	LexisNexis runs accuracy validation
12	NA	LexisNexis sends discrepancy reports to QHP Issuers
13 - End of Month	Up to 10	QHP Issuer conducts research/makes corrections to provider record and pulls provider data as of last day of current month

Table 1: Typical monthly submission cycle represented in business days

Issuers submitting before the deadline can re-submit files up to the deadline if there is a problem with the file structure or structural validation causing a failed submission. If an Issuer fails to submit a structurally valid file by the deadline or if the submitted file fails validation with no valid substitute by the deadline, Covered California will resort to the last useable file submitted by the Issuer if that file is less than 3 months old. If the last usable file is more than 3 months old, an Issuer’s provider data will be omitted entirely from the online display. NOTE: One exception to this process is for the February submission, for which there cannot be a last useable file because of the transition to new plan_year values in the February submission.

B. Validity (Completeness):

This pertains to the **Structural Validity** of the incoming files and aims to ensure their usability. Covered California has created a process whereby each incoming file submission from participating Issuers is subjected to a structural validation process to ensure usability of the submitted file for the accuracy checks and consolidation required for integration into the online Multiplan Directory.

This process primarily addresses inappropriate blanks and missing data in critical fields (see Table 2) in addition to transposition of fields and other structural aspects of the file. Structural validation will be initially assessed only for Physicians, Dentists, and Hospitals (Provider Types P, D and H).

Prior to checking files for structural validation, Covered California will filter incoming files for Individual market Network IDs and Provider Types P, D, and H. For dentists (Provider Type = D), Covered California will only assess structural validation if the Type of Licensure field is populated with DDS. Dentists with other types of licensures will be filtered out prior to the structural validation process and will not be displayed in the online directory.

#	Field	All or Subset of Providers?
1	Provider_Type	All (P, D and H)
2	First_Name	Subset (Provider_Type = P, D)
3	Last_Name	Subset (Provider_Type = P, D)
4	OSHPD_ID	Subset (Provider_Type = H)
5	Location_Address	All (P, D and H)
6	Location_City	All (P, D and H)
7	Location_State	All (P, D and H)
8	Location_Zip_Code	All (P, D and H)
9	Primary_Specialty	Subset (Provider_Types = P, D)
10	Network_ID	All (P, D and H)
11	Accepting_New_Patients	All (P, D and H)
12	Plan_Year	All (P, D and H)
13	Invalid Visibility (P)	Subset (Provider_Type = P)
14	Invalid Visibility (D)	Subset (Provider_Type = D)
15	Invalid Visibility (H)	Subset (Provider_Type = H)

Table 2: Data fields subject to structural validation

- If 1% or greater of all input records are blank for any one of the above fields or if the input file does not match the number of columns in the input file layout, the Issuer's input file will be rejected. The rejected record counts and reason will be part of the communication. Other fields may be added as necessary to this validation step.
- If less than 1% of all input records are blank for any one of the above fields, the Provider Data Submission file will be processed and the record will be returned in the Detail Discrepancy File. Fields with blanks will be omitted entirely from the online display.
- For the OSHPD ID structural validation check, if 1% or greater of all input records for QHPs with 100 or more facilities are blank or have unacceptable "X" or "U" values, the input file will be rejected. If the QHP has 100 or less facilities, one invalid OSHPD ID will be allowed. If more than one invalid OSHPD ID is found, the input file will be rejected.
- For the Primary Specialty, in addition to checking for the unacceptable values of blank, "X" or "U", the structural validation check includes validation that the taxonomy code is 10-characters with the first three characters being numeric, next six being alpha and/or numeric and last character = X with a field length = 10.
- The Invalid Visibility structural validation checks ensure that an Issuer's entire file is not set to Visibility = No. An input file will only fail if the Visibility field = No for 100% of provider types P, D or H.
- Failing structural validation has implications for representation on the online directory as discussed above in the section on timeliness.
 1. If an Issuer fails to submit a structurally valid file by the deadline or if the submitted file fails validation, Covered California will resort to the last useable file submitted by the Issuer if that file is less than 3 months old.
 2. If the last usable file is more than 3 months old, an Issuer's provider data may be omitted from the online display. The communication process for all such events is detailed below in Section 5.
 3. NOTE: One exception to this process is for the February submission, for which there cannot be a last useable file because of the transition to new plan year values in the February submission.
- Issuers can re-submit files up to the deadline if there is a problem with the file structure or structural validation causing a failed submission.

Figure 2 shows the process workflow for structural validation and file acceptance/rejection.

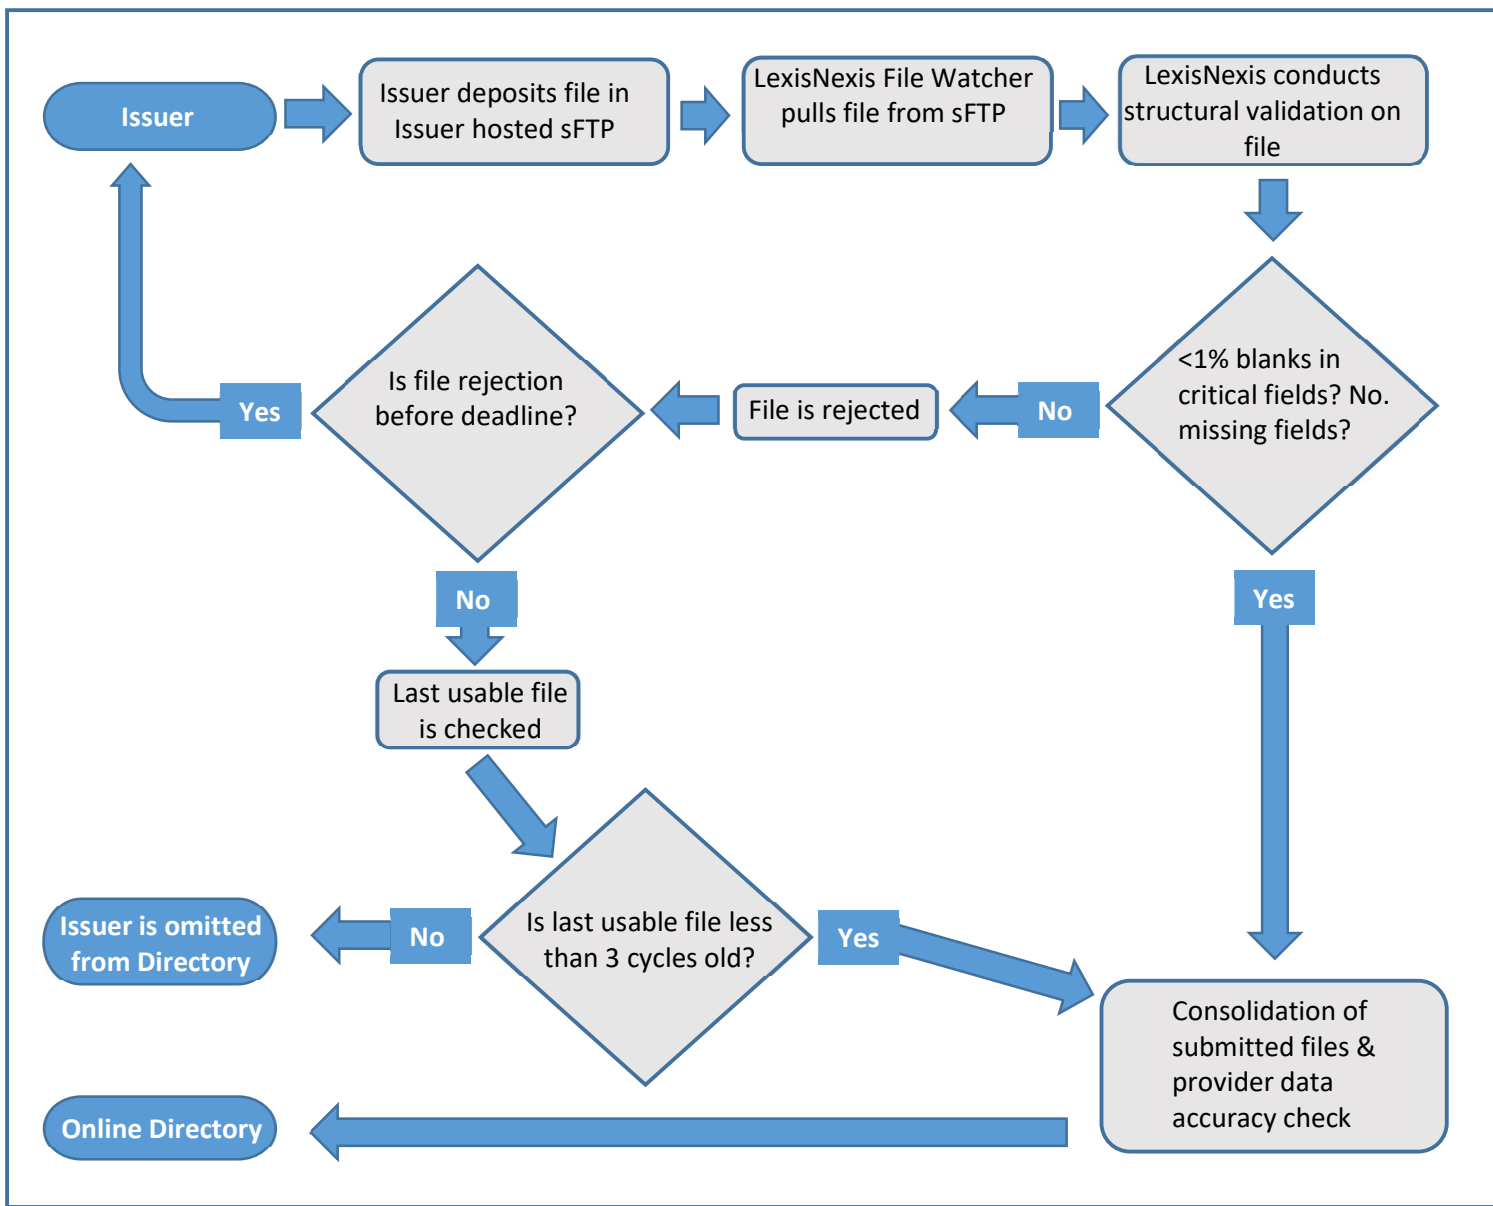

Figure 2. Structural Validation and File Acceptance Criteria

C. Consistency (Reasonability):

This pertains to the quality of the data taken beyond the individual element. After ensuring the validity of the individual data elements, the data in its entirety must be plausible and reasonable as a whole.

For e.g., a file may be timely, contain no blanks but when analyzed, has a distribution of physician specialties that falls outside the expected or typical distribution of specialties of a similar network or the primary care to specialty care physician ratios may be outside expected norms for the network type. If this is the case, further analysis of the data set may be warranted.

Covered California conducts several tests on the consistency of a submitted dataset against the following parameters. Some of these are assessed and reported in the Discrepancy Reports (see Section 3.D. or the ProviderPoint User Guide available on the Covered California Extranet under [“Provider Directory Resources”](#) for details). The majority, however, will be assessed and reported separately.

#	Consistency Validation
1	Anesthesiologist address does not match an in-network hospital address
2	Hospitalist address does not match an in-network hospital address (see glossary for definition of Hospitalist)
3	Distribution of physician specialties is unexpected or not typical for network type
4	Physician affiliated hospitals must be in-network
5	Hospital must have adequate number of physicians able to admit to that hospital in the network and in reasonable proximity
6	Lower tiered hospitals in the network should have a reasonable number of affiliated physicians so that patients are not obligated to use a higher tiered hospital due to physician affiliation
7	Percentage of providers accepting new patients
8	Discrepancy in reported specialty across issues
9	Physician does not have admitting rights to an in-network hospital
10	Hospital does not have physicians able to admit to it in the network
11	Percentage of board-certified physicians
12	Ratio of primary care to specialist physicians outside norms for network type
13	PCP specialty is not typically associated with PCPs
14	Physician or dentist has numerous active locations - Based on the number and geographic spread of locations it is unrealistic that a provider truly practices at all locations
15	Physician or dentist has a location in a non-adjacent County - Individual provider has multiple active locations located in non-adjacent counties or locations that are significantly distant from each other

Table 3: Possible checks for consistency (reasonability) validation

D. Accuracy:

This pertains to how closely submitted data mirrors the actual real-world status of the networks it purports to represent. Ensuring accuracy has always been a top priority for Covered California due to the implication inaccuracies have on consumer choice, continuity of care and providing a clear representation of Issuer products. To assess accuracy, LN provides a data cleansing and consolidation service via their ProviderPoint Solution to compare data submitted by Issuers to the LN’s proprietary Master Provider Referential database (MPRD) and conduct verification, de-duplication, correction, and augmentation of provider files. Please refer to the ProviderPoint User Guide available on the Covered California Extranet under “[Provider Directory Resources](#)” for details.

Covered California has classified accuracy errors into three distinct tiers depending on their severity and impact on the consumer shopping experience as follows:

Tier 1 Discrepancies: These are high priority potential errors that could severely impact and undermine consumer choice. Covered California will suppress provider records with discrepancies in this category until resolved or verified to be accurate. The table below lists all the Tier 1 discrepancy types and the corresponding client integration code (the code you use to find the specific provider records with these discrepancies in the Detail Discrepancy File.)

	Tier 1 - High Priority Critical Discrepancy- Significant Member Impact	Code
1	Provider Status Reported Deceased	U
2	Provider Status Retired	R1, R2
3	License Expired	I, K
4	Federal OIG/LEIE Sanction	Y
5	Federal OPM Sanction	Y
6	OSHPD ID is not valid or does not appear on reference list - facilities only	Y
7	OSHPD ID type of service does not match type of service field - facilities only	Y
8	Practice Address inactive, update available	GD, GN, II
9	Practice Address inactive, no update available	IR
10	Practice Address inactive and inactive/suspended license	Z
11	Practice Address is PO Box	P
12	Taxonomy code is not appropriate for provider type = P = (taxonomy <> 20)	Y
13	Taxonomy code is not appropriate for provider type = D = (taxonomy <> 12)	Y
14	Taxonomy code is not appropriate for provider type = H = (taxonomy <> 28)	Y
15	No match input records	Y

Tier 2 Discrepancies: These are potential errors that could lead to some consumer confusion and therefore need to be flagged, investigated, and verified but will not be suppressed from online display. The table below lists all the Tier 2 discrepancy types and the corresponding code.

	Tier 2 - Medium Priority Discrepancy - member confusion (record counts)	Code
17	Practice Phone verified inactive, update available	G
18	Practice Phone verified inactive, no update available	I
19	Practice Phone questionable, update available	E
20	Practice Phone questionable no update	B, M, J
21	Restrictive Sanction in practice state	Y
22	Provider Name potentially transposed	CT
23	Provider Name matched to "Formerly Known as Name"	F
24	Male/Female Identification	A
25	Practice Address is undeliverable	X
26	Practice Address is inactive (lower confidence than tier 1 inactive addresses)	I2
27	Practice Address – High Risk – Address matches to a non-postal secondary range.	N
28	License Suspended in a state (may not be practice state)	8
29	License Unverified, augmentation available in practice state	L
30	License Blank – no augmentation	M
31	License belongs to different provider, augmentation available	Q
32	License unverified – augmentation available NOT in practice state	T
33	License Blank – augmentation available NOT in practice state	W
34	License Expired – active license augmentation available in practice state	G

Tier 3 Discrepancies: These are potential errors that are not expected to impact the consumer plan selection experience but need to be flagged to improve the overall integrity of the data and to improve provider data consolidation from multiple Issuers into one record per provider per location. The table below lists all the Tier 3 discrepancy types and the corresponding code.

	Tier 3 - Low Priority Discrepancy	Code
36	NPI Correction Available	1, Q, S, A, L, G
37	NPI Unverified or bad format, doesn't pass checksum; no augmentation	Blank, B
38	NPI input blank; bad or unverified; only NPI found is deactivated; checksum fail	F, I, M
39	NPI Type 1 or Type 2 mismatch; no augmentation	2
40	NPI Deactivated	D1, D2
41	Rating Regions not aligned with county ZIP code combinations	Y

Covered California will exclude all Tier 1 errors from online display. As detailed above, these are the errors most likely to cause a significant impact to the consumer experience and mislead consumers during the critical plan selection phase of enrollment. Information containing these types of errors will remain suppressed until resolved or verified to be accurate. Details on how Issuers can provide feedback and dispute errors with Covered California are detailed in the ProviderPoint User Guide available on the Covered California Extranet under [“Provider Directory Resources”](#).

Information with Tier 2 and Tier 3 errors will not be excluded from the online display with the understanding that these errors may contribute to consumer confusion and should be addressed in a timely manner by the submitting Issuer. The focus initially should be resolving the flagged Tier 1 errors.

Covered California will assess accuracy of provider information every cycle by comparing the incoming input file with the ProviderPoint referential database and generate the following accuracy related reports:

1. **Waterfall Report:** Summary view of the discrepancies identified by ProviderPoint in the QHP’s provider data submission file
2. **Discrepancy Reports:**
 - a. Detail Discrepancy Report: Record level detail about the discrepancies as summarized in the Waterfall Report
 - b. Simple Discrepancy Report: Same content as the Detail Discrepancy report except that data is organized with each Tier 1 discrepancy type in its own tab containing only the necessary fields to review and verify the discrepancy
 - c. Tier 2 and 3 Simple Discrepancy Report: Simple Discrepancy Report for Tier 2 and Tier 3 discrepancies
3. **Address Phone Fax Report:** Detailed file that includes additional address, phone and/or fax numbers (to be used for potential phone or fax corrections)
4. **Net New Address Report:** Condensed version of the Address Phone Fax Report that contains only “new addresses” (to be used for potential address corrections)
5. **Board Sanction:** Provides Federal and State Medical Board sanction details on the providers identified as having sanctions

[Back to Contents](#)

4. General data guidelines when creating and submitting file(s)

A. Dealing with missing, unknown, or non-applicable values

- All fields are required if they apply.
- If the information exists on the Issuer’s online directory, the expectation is that it will be provided to Covered California.
- Blanks are only permissible if data does not apply to the provider type. An example of this is when it applies to any of the name fields for individual providers: it is permissible to enter First_Name and Last_Name as null for Provider_Type H (Hospitals). These are situational fields i.e., certain elements apply only to certain provider types. Please refer to the “Detailed Definitions and Specifications of Data Elements”, Section 5 of this document, for details on situational data elements.
- “Other” is never an acceptable value.

B. Data Formats, Data Types and Standardizations

- For the purposes of online display, Covered California will standardize the information it receives from the various participating Issuers to the best available authority source. This is vital to ensure adequate consolidation of this data to the goal of one provider per location per row.
- Data element names must be submitted exactly as specified by Covered California if a reference is provided. Alternate or abbreviated names will not be accepted. All provider names will ultimately be standardized for online display.
- Covered California provides several reference lists and crosswalks to create a more standardized controlled input. In addition, there are many data fields in the layout that require a specific data input type. Some of the main data types used in creating the submission file are:
 - **Coded Text:** these fields derive their value from a code table with each acceptable value and its meaning. These tables or lists are available as appendices or in one of the companion documents to this guide e.g., the Covered California Data Dictionary.
 - **Integers:** exact integral numeric values (e.g., number of assigned enrollees).
 - **Unique Identifier:** these fields contain various alpha numeric identifiers for individual elements.
 - **Numeric Strings**
 - **Text:** character strings (with optional language). Unless otherwise constrained by an implementation, can be any combination of alpha, numeric or symbols from the Unicode character set. Sometimes referred to as free text.
 - **Boolean:** these fields have 1 of 2 acceptable values, usually Y or N, X or null, etc. and represent a simple “true” vs “false” switch.
 - **Date:** must be in MM/DD/YYYY format.

C. Row counts, row duplications and included provider types

- Within a provider network for each product, Issuers should limit the number of records per provider to the number of locations for the provider, i.e., if a provider practices in 5 locations it is permissible to list each location as a separate row. However, duplicating records per provider for other data elements such as phone number is discouraged; the best phone number should be chosen for

each location listed for the provider. Similarly, the best three languages for the provider should be chosen and no rows per provider should be duplicated by language (if a provider speaks more than three languages). The same applies to other data elements.

- Dental providers included in the Issuer’s provider network offering as part of the embedded pediatric dental benefit should be included in the QHP Issuer’s input file. Dentists should be marked as Provider_Type = D.
 - Covered California will only assess structural validation if the Type of Licensure field is populated with DDS for records where Provider_Type = D. Dentists with other types of licensures will be filtered out prior to the structural validation process and will not be displayed in the online directory.
- Issuers should include all network providers in the input file and ensure that all provider locations available to Covered California enrollees are included in the input file.
- Currently certified QHP Issuers and new entrant applicants seeking to use this guide to create a submission file for the purpose of annual certification must, to the extent possible, depict networks for the year they are seeking certification, not for the current plan year (PY). For example, a current Issuer applying for certification for PY 2026 must submit a file depicting 2026 networks during the certification period which occurs mid-2025. For monthly provider data submissions, Issuers must submit current data for their provider networks. See Appendix IV for details.
- Special attention is recommended when submitting a file for the annual open enrollment period. Issuers should indicate whether a provider is available in the Issuer’s network for the current and upcoming PY using the Plan_Year field. For example, if a provider’s contract ends on December 31st of the current PY, the Issuer should list the provider as only available in the current PY and not available in the future PY. Please see Section 5 for more details on indicating provider availability for each year.

D. File Format and Naming Conventions

The data should be submitted as a pipe delimited text file. This format will enable use of special characters in the content of the submitted file and reduce the need to scrub the input files for commas and other common characters used in names, addresses, etc.

Issuers must use the following file naming standard for the input files submitted to Covered California.

File	Naming Convention
Medical Provider Roster Files	MM_YYYY_ISSUERID_QHP_CC.TXT
Dental Provider Roster Files	MM_YYYY_ISSUERID_QDP_CC.TXT

ISSUERID = Issuer HIOS ID number. Refer to Appendix I for a list of the HIOS numbers for currently participating QHP and QDP Issuers.

MM_YYYY = Month and year of submission due date as specified by Covered California.

Example: 06_2025_12345_QHP_CC.TXT

Variation from this naming standard may result in file rejection in the automated file transmission process described in the next section. Please note that Trailer records are no longer required as part of the input file and should not be included in the submission.

E. File Transmission Guidelines

Each participating Issuer is required to submit a monthly input file containing complete network data according to the specifications defined in this document. To ensure a timely and smooth submission process, Covered California requires each participating Issuer to set up and host a Secure File Transmission Protocol (sFTP) site with an inbound and outbound directory. Access must be granted to Covered California to “push and pull” files to and from the sFTP. Covered California will automatically retrieve monthly submissions from the outbound directory every month and deposit any reports or feedback files to the inbound directory. Participating QHPs and QDPs must provide:

- sFTP URL
- sFTP login information
- Inbound and Outbound directories

Please whitelist the following LexisNexis Public IP Addresses (LN): 209.243.55.184, 198.185.18.207, 198.185.18.210, 69.84.186.75, 69.84.186.89, 198.62.62.0/23, 69.84.182.0/23, 198.62.63.10, 2620:100:403e::/47, 69.84.180.11, 69.84.180.12, 69.84.180.13, and 198.62.63.11.

F. Communications between Covered California and Participating Issuers

Effective and timely communication is essential for the success of the online Multiplan Provider Directory. Each participating Issuer must notify Covered California via email when a file has been deposited on the Issuer-hosted sFTP. Covered California will send communications to Issuers when:

- The Issuer fails to submit a file by the deadline and a usable file from the Issuer is available that is less than 3 months old, notifying the Issuer that the last usable file will be used for the directory.
- The Issuer fails to submit a file by the deadline and a usable file from the Issuer is not available (more than 3 months old), notifying the Issuer that no provider data will be included in the online directory for the cycle.
- A file fails structural validation and is rejected with the option to resubmit up to the identified deadline.
- A file fails structural validation and is rejected without the option to resubmit and where a usable file from the Issuer is available that is less than 3 months old, notifying the Issuer that the last usable file will be used for the directory.
- A file fails structural validation and is rejected without the option to resubmit and where a usable file from the Issuer is not available (more than 3 months old), notifying the Issuer that no provider information will be included in the directory for the cycle.

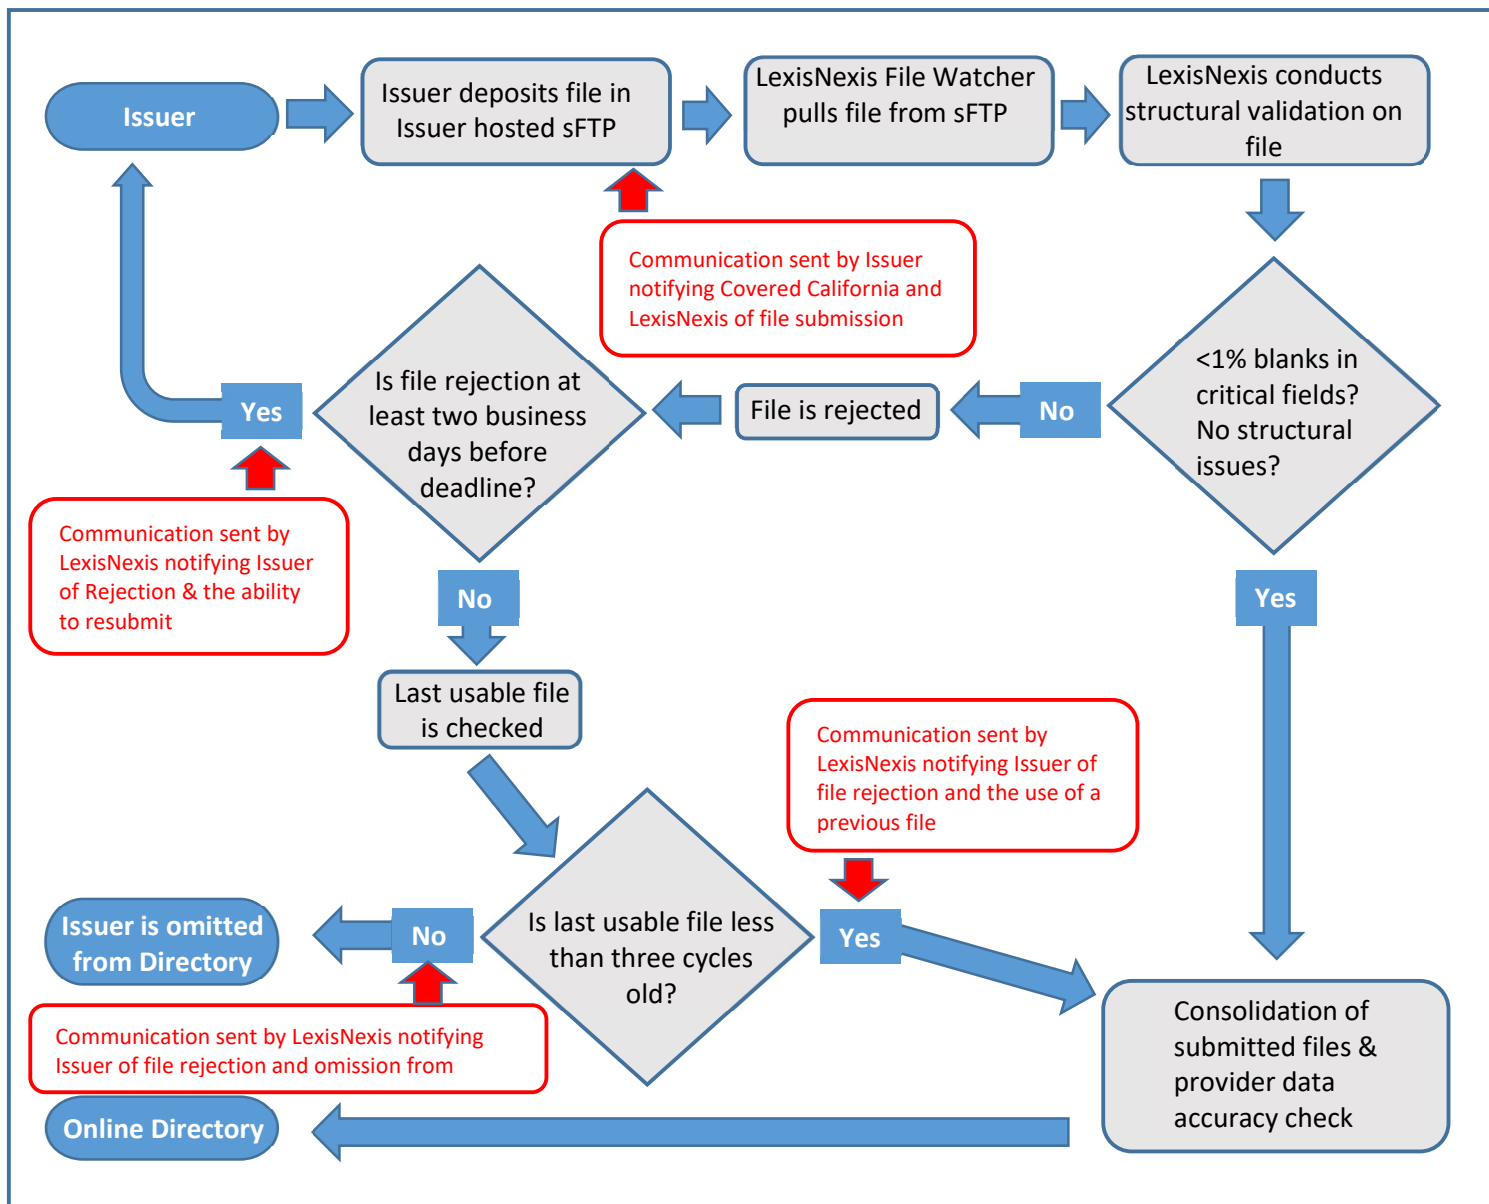

Figure 03. Communications during file validation

5. Submission File Layout

The file should consist of two portions: A header row and a number of detail rows. Each portion is described in the sections below.

A. Header record data elements

The header record contains the names of the fields that make up the detail records.

Field No.	Data Element Header Names	Note
1	Last_Name	1 st record only
2	First_Name	1 st record only
3	Middle_Name	1 st record only
4	Provider_Type	1 st record only
5	NPI	1 st record only
6	CA_License	1 st record only
7	Non_CA_License	1 st record only
8	Non_CA_License_State	1 st record only
9	Provider_Gender	1 st record only
10	Provider_Language_1	1 st record only
11	Provider_Language_2	1 st record only
12	Provider_Language_3	1 st record only
13	Facility_Language_1	1 st record only
14	Facility_Language_2	1 st record only
15	Facility_Language_3	1 st record only
16	Type_of_Licensure	1 st record only
17	Location_Address	1 st record only
18	Location_Address_2	1 st record only
19	Location_Zip_Code	1 st record only
20	Location_City	1 st record only
21	Location_County	1 st record only
22	Location_Region	1 st record only
23	Location_State	1 st record only
24	Location_Phone	1 st record only
25	Provider_Clinic_Name	1 st record only

Field No.	Data Element Header Names	Note
26	Provider_Clinic_ID	1 st record only
27	Primary_Specialty	1 st record only
28	Secondary_Specialty	1 st record only
29	Board_Certified	1 st record only
30	Medical_Group/IPA_1	1 st record only
31	Medical_Group/IPA_2	1 st record only
32	Medical_Group/IPA_3	1 st record only
33	Medical_Group/IPA_4	1 st record only
34	Contract_Type	1 st record only
35	Hospital_1	1 st record only
36	Hospital_2	1 st record only
37	Hospital_3	1 st record only
38	Hospital_4	1 st record only
39	Hospital_1_OSHPD_ID	1 st record only
40	Hospital_2_OSHPD_ID	1 st record only
41	Hospital_3_OSHPD_ID	1 st record only
42	Hospital_4_OSHPD_ID	1 st record only
43	Hospitalist_(Hosp_1)	1 st record only
44	Hospitalist_(Hosp_2)	1 st record only
45	Hospitalist_(Hosp_3)	1 st record only
46	Hospitalist_(Hosp_4)	1 st record only
47	NPI_Sup_PCP	1 st record only
48	Sup_PCP_Specialty	1 st record only
49	DEA	1 st record only
50	Facility_Name	1 st record only
51	Facility_System	1 st record only
52	OSHPD_ID	1 st record only
53	Type_of_Service	1 st record only
54	Tertiary_Care	1 st record only
55	FTIN	1 st record only
56	Last_Update	1 st record only

Field No.	Data Element Header Names	Note
57	Plan_Year	1 st record only
58	Current_Assigned_Enrollees	1 st record only
59	PCP_Flag	1 st record only
60	Network_ID	1 st record only
61	Network_Tier_ID	1 st record only
62	Availability	1 st record only
63	Visibility	1 st record only
64	Covered_California_ID	1 st record only
65	ECP_Flag	1 st record only
66	Accepting_New_Patients	1 st record only
67	Snapshot_Date	1 st record only
68	Issuer_Provider_ID	1 st record only
69	Issuer_PCP_ID	1 st record only
70	Record_Type	1 st record only

B. Detail Record Data Elements

The following specifications pertain to the detail record portion of the submitted set and represent all records between the header and the trailer.

Field No.	Field Name	Max Lgth	Format	Type	Data Element Description	Facility Indiv Both
1	Last_Name	50	Char	Text	Last name of provider	I
2	First_Name	50	Char	Text	First name of provider	I
3	Middle_Name	50	Char	Text	Middle initial of provider	I
4	Provider_Type	2	Char	Coded Text	Indicates type of individual provider: Physician = P Dental Provider = D Physician Extender = PE Other Individual Provider = OI Hospital = H Clinic = C Other Contracted Provider Facility = OF	B
5	NPI	10	Num	Unique ID	National Provider Identification (NPI) number of the individual	B
6	CA_License	15	Char	Unique ID	California License number, applies to all providers and facilities	B
7	Non_CA_License	15	Char	Unique ID	License number for non-CA licensed/Out of state providers	B
8	Non_CA_License_State	2	Char	Coded Text	License state for non-CA licensed/Out of state providers	B
9	Provider_Gender	1	Char	Boolean	Gender of the Provider	I
10	Provider_Language_1	20	Char	Coded Text	1st Language spoken by the provider other than English	I
11	Provider_Language_2	20	Char	Coded Text	2nd Language spoken by the provider other than English	I
12	Provider_Language_3	20	Char	Coded Text	3rd Language spoken by the provider other than English	I
13	Facility_Language_1	20	Char	Coded Text	Language spoken by an individual employed at the provider's office or facility but not spoken by the provider other than English	I
14	Facility_Language_2	20	Char	Coded Text	Language spoken by an individual employed at the provider's office or facility but not spoken by the provider other than English	I
15	Facility_Language_3	20	Char	Coded Text	Language spoken by an individual employed at the provider's office or facility but not spoken by the provider other than English	I
16	Type_of_Licensure	5	Char	Coded Text	e.g., MD, DO for physicians - Refer to lookup table for remainder of licensed medical professions in CA	I
17	Location_Address	35	Char	Text	1st line street address for provider or facility location	B
18	Location_Address_2	10	Char	Text	2nd line street address for provider or facility location	B
19	Location_Zip_Code	5	Num	Numeric string	5-digit ZIP code of provider or facility location	B
20	Location_City	25	Char	Text	City of provider or facility location	B
21	Location_County	25	Char	Text	County of provider or facility location	B
22	Location_Region	2	Num	Coded Text	Covered California rating region of provider or facility location	B
23	Location_State	2	Char	Coded Text	State of provider or facility location	B
24	Location_Phone	12	Char		Phone number of provider or facility location	B

Guidelines, Standards, and Specifications

Field No.	Field Name	Max Lgth	Format	Type	Data Element Description	Facility Indiv Both
25	Provider_Clinic_Name	50	Char	Text	If individual provider works at a clinic, enter the clinic name	I
26	Provider_Clinic_ID	16	Char	Unique ID	If individual provider works at a clinic, enter the clinic ID	I
27	Primary_Specialty	10	Char	Coded Text	Primary specialty of the provider. In case of physicians, this must be highest/latest certification received by the provider, e.g. Neonatologist with a specialty in Pediatrics should be listed as Neonatologist unless it is explicitly known that provider practices primarily as a Pediatrician.	B
28	Secondary_Specialty	10	Char	Coded Text	Secondary specialty of the provider. Should be populated when provider has secondary/base specialty.	B
29	Board_Certified	1	Char	Coded Text	Board certified, eligible or non-certified indicator	I
30	Medical_Group/IPA_1	50	Char	Text	Name of first medical group and/or IPA affiliated with contracted provider (if applicable)	I
31	Medical_Group/IPA_2	50	Char	Text	Name of second medical group and/or IPA affiliated with contracted provider (if applicable)	I
32	Medical_Group/IPA_3	50	Char	Text	Name of third medical group and/or IPA affiliated with contracted provider (if applicable)	I
33	Medical_Group/IPA_4	50	Char	Text	Name of fourth medical group and/or IPA affiliated with contracted provider (if applicable)	I
34	Contract_Type	2	Char	Boolean	Delegated vs. Direct Contract	B
35	Hospital_1	50	Char	Text	Name of the first hospital with which the provider holds admitting privileges	I
36	Hospital_2	50	Char	Text	Name of the second hospital with which the provider holds admitting privileges	I
37	Hospital_3	50	Char	Text	Name of the third hospital with which the provider holds admitting privileges	I
38	Hospital_4	50	Char	Text	Name of the fourth hospital with which the provider holds admitting privileges	I
39	Hospital_1_OSHPD_ID	10	Char	Coded Text	OSHPD ID Number for the first hospital with which the provider holds admitting privileges	I
40	Hospital_2_OSHPD_ID	10	Char	Coded Text	OSHPD ID Number for the second hospital with which the provider holds admitting privileges	I
41	Hospital_3_OSHPD_ID	10	Char	Coded Text	OSHPD ID Number for the third hospital with which the provider holds admitting privileges	I
42	Hospital_4_OSHPD_ID	10	Char	Coded Text	OSHPD ID Number for the fourth hospital with which the provider holds admitting privileges	I
43	Hospitalist_(Hosp_1)	1	Char	Boolean	Hospitalist Indicator for the first hospital with which the provider holds admitting privileges	I
44	Hospitalist_(Hosp_2)	1	Char	Boolean	Hospitalist Indicator for the second hospital with which the provider holds admitting privileges	I
45	Hospitalist_(Hosp_3)	1	Char	Boolean	Hospitalist Indicator for the third hospital with which the provider holds admitting privileges	I
46	Hospitalist_(Hosp_4)	1	Char	Boolean	Hospitalist Indicator for the fourth hospital with which the provider holds admitting privileges	I

Guidelines, Standards, and Specifications

Field No.	Field Name	Max Lgth	Format	Type	Data Element Description	Facility Indiv Both
47	NPI_Sup_PCP	10	Char	Unique ID	National Provider Identification (NPI) number of the Supervising provider in case of PCP extenders	I
48	Sup_PCP_Specialty	10	Char	Coded Text	Supervising Providers primary specialty	I
49	DEA	12	Char		Provider Drug Enforcement Administration (DEA) Number	I
50	Facility_Name	50	Char	Text	Legal name of facility utilized by the Plan. In case of hospitals, use name exactly as listed on the Covered California Reference list.	F
51	Facility_System	50	Char	Text	Health system of facility	F
52	OSHPD_ID	10	Char	Unique ID	In case of hospitals, use as per Covered California OSHPD ID list.	F
53	Type_of_Service	5	Char	Coded Text	Type of Service as defined by the Facility Type	F
54	Tertiary_Care	1	Char	Boolean	Tertiary Care Indicator	F
55	FTIN	9	Char	Unique ID	The federal tax ID of the provider	B
56	Last_Update	10	Char	Date	Last time provider data updated	B
57	Plan_Year	4	Num	Coded Text	Year available	B
58	Current_Assigned_Enrollees	6	Num	Numeric String	For Primary Care Clinics & Primary Care Physicians: the total number of patients assigned to the provider	B
59	PCP_Flag	1	Char	Boolean	Provider or Clinic is designated as PCP by issuer	B
60	Network_ID	11	Char	Alphanumeric String	Network ID assigned by Covered California	B
61	Network_Tier_ID	1	Num	Coded Text	Network Tier ID	B
62	Availability	1	Char	Boolean	Available directly or with special authorization/referral	B
63	Visibility	1	Char	Boolean	Indicates whether provider is to be displayed on online directory	B
64	Covered_California_ID	16	Char	Unique ID	Used to flag ECP providers	F
65	ECP_Flag	1	Char	Boolean	Used to flag ECP providers	B
66	Accepting_New_Patients	1	Char	Boolean	Accepting New Patients Indicator	B
67	Snapshot_Date	10	Char	Date	Date of data extraction for file	B
68	Issuer_Provider_ID	35	Char	Unique ID	Issuer assigned provider ID	B
69	Issuer_PCP_ID	35		Unique ID	Issuer assigned primary care provider ID	I
70	Record_Type	1	Char	Hardcoded	Type of Record: D for Detail (non-Header and non-Trailer records)	B

C. Data Element Detail Descriptions

In this section, each data element will be discussed in detail under the context of the following headers:

Header	Description
Technical Specifications	
Definition	Description of the data element
Applicable to	Determines which provider type this data element is relevant to. <ul style="list-style-type: none"> • Facility Providers, including Hospitals “H”, Clinics “C” or Other Types of Facilities “OF”. • Individual Providers, including Physicians “P”, Dental Providers “D”, Physician Extenders “PE” Certain data elements will only apply/be required for a subset of individual or facility providers.
Max Length	The maximum length a value may have in this field. Values may be equal or less than this number in length.
Data Format and Type	The type of data, either character (Char) or numeric (Num). Data Type is a classification that specifies which type of value a variable has and what type of operations can be applied to it. e.g., Date is a data type that is used to classify date values.
Acceptable Values/Data Value Domain	Description of all acceptable input values for this data element if applicable. Controlled terminology vs non-controlled terminology.
Structural Validation	States if the data element is assessed for structural requirements in the preprocessing validation step, i.e., are there excessive null values in fields critical to the online directory.
Business Context/Specifications	
Relevance to Multi-Plan Directory	Description of relevancy of this data element to Covered California’s Multiplan Directory. Also, specifies if element is visible and/or searchable to consumers online.
Authority Source	Many data elements are issued by or can be obtained from certain authority sources which are typically the issuing agencies or reliable and verified sources for the data. QHPs will be the authority source for some data elements such as Network ID, Panel Status and other elements defined by contract between the Issuer and the provider.

Guidelines, Standards, and Specifications

Header	Description
Consistency and Accuracy Validation	Description of the validation checks performed on this data element. This can consist of two main types of validation: <ul style="list-style-type: none">• Consistency Validation: data elements are assessed for consistency across the file (e.g., we would expect Last Name and First Name inputs for individual providers).• Accuracy: data elements are checked for accuracy against a Master Provider Referential Database. LexisNexis currently provides this service to Covered California.
QHP FAQs	Miscellaneous notes, tips, and additional information to assist in the successful submission of the data element.

Last_Name	
Technical Specifications	
Definition	The last name of an individual provider contracted with the health plan to provide services to enrollees
Applicable to	Individual Providers only (where Provider_Type = "P","D","OI", "PE")
Max Length	50
Format / Type	Char / Text
Acceptable Values	<ol style="list-style-type: none"> 1. Must be full name and not initials 2. "U" and "X" are not acceptable values for provider types "P", "D", "OI" and "PE" and will not be taken to indicate "Not applicable" or "Unknown" 3. Field should be left blank for provider types "H", "C" and "OF"
Structural Validation	Structural validation will be performed on individual providers with provider type = "P" and "D" "U" and "X" are acceptable values for provider types "P" and "D"
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Critical to the search and identification of individual providers (with provider types "P", "D") 2. Visible to consumers and searchable online.
Authority Source/Data Standard	<ol style="list-style-type: none"> 1. Medical Board of California: Covered California will standardize the last name to the name on the MBC license. Medical Board license info can be found at http://www.mbc.ca.gov/ 2. Osteopathic Medical Board of California: Covered California will standardize last name to name on the OMBC license. Medical Board license info can be found at http://www.ombc.ca.gov/ 3. Other provider types will be verified against their respective licensing board information. General information on licensing boards in California can be found at the Department of Consumer Affairs' website at http://www.dca.ca.gov
Data Consistency & Accuracy Validation	<ol style="list-style-type: none"> 1. For provider types "P" and "D", Last Name will be standardized based on the name found in the authority source, if the provider has a California License. 2. Transposition error: Names are checked for potential transposition with transposed names flagged in the detail result file. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File 3. "Formerly known as" validation: Input names are matched to "Formerly Known As" field in NPPES or DEA database. Formerly known as names are flagged in the detail result file. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this error.
QHP FAQs	
Examples	

First_Name	
Technical Specifications	
Definition	The first name of an individual provider contracted with the health plan to provide services to enrollees
Applicable to	Individual Providers only (where Provider_Type = "P","D","OI", "PE")
Max Length	50
Format / Type	Char / Text
Acceptable Values	<ol style="list-style-type: none"> 1. Must be full name and not initials 2. "U" and "X" are not acceptable values for provider types "P", "D", "OI" and "PE" and will not be taken to indicate "Not applicable" or "Unknown" 3. Field should be left blank for provider types "H", "C" and "OF"
Structural Validation	Structural validation will be performed on individual providers with provider type = "P" and "D" "U" and "X" are acceptable values for provider types "P" and "D"
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Critical to the search and identification of individual providers (with provider types "P", "D") 2. Visible to consumers and searchable online
Authority Source/Data Standard	<ol style="list-style-type: none"> 1. Medical Board of California: Covered California will standardize the first name to the name on the MBC license. Medical Board license info can be found at http://www.mbc.ca.gov/ 2. Osteopathic Medical Board of California: Covered California will standardize first name to name on the OMBC license. Medical Board license info can be found at http://www.ombc.ca.gov/ 3. Other provider types will be verified against their respective licensing board information. General information on licensing boards in California can be found at the Department of Consumer Affairs' website at http://www.dca.ca.gov
Data Consistency & Accuracy Validation	<ol style="list-style-type: none"> 1. For provider types "P" and "D", First Name will be standardized based on the name found in the authority source, if the provider has a California License. 2. Transposition error: Names are checked for potential transposition with transposed names flagged in the detail result file. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File 3. "Formerly known as" validation: Input names are matched to "Formerly Known As" field in NPPES or DEA database. Formerly known as names are flagged in the detail result file. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this error.

QHP FAQs	
Examples	

Provider_Type	
Technical Specifications	
Definition	<ul style="list-style-type: none"> • Provider Type classifies individual providers into one of seven categories: <ul style="list-style-type: none"> • Physicians=" P", Dental Providers=" D", PCP extenders="PE", all other individual provider categories = "OI", Hospitals = "H", Clinics="C", and all other facility provider categories = "OF" • Physician (P) is defined as an authorized practitioner of medicine, as one graduated from a college of medicine (MD) or osteopathy (DO) and licensed by the appropriate board. For Provider Type = P, the first two characters of the NUCC taxonomy code should be 20. • Dental Provider (D) is defined as: one who is skilled in and licensed to practice the prevention, diagnosis and treatment of diseases, injuries, and malformations of the teeth, jaws and mouth and who makes and inserts false teeth. For Provider Type = D, the first two characters of the NUCC taxonomy code should be 12. • PCP Extender (PE) is defined as a healthcare professional specially trained and certified to provide basic medical services under the supervision of a licensed physician. Physician Extenders may order tests and make referrals related to the Member's medical needs. Physician Extenders function as an agent of the physician. They can include, but are not limited to: <ul style="list-style-type: none"> • Nurse Practitioner (NP): Can obtain medical histories and perform physical exams, diagnose and treat acute health problems, chronic diseases, and order, perform or Interpret diagnostic studies within the scope of their practice and license. Nurse Practitioners work in the same practice as a physician (PCP or specialist) and may act as an Assistant surgeon if certified under applicable state law • Physician Assistant (PA): Can perform physical examinations, diagnose and treat illnesses, order and interpret lab results, suture wounds and assist in surgery within the scope of their practice and license. Physician Assistants work in the same practice as a physician (PCP or specialist) and may act as an Assistant Surgeon if certified under applicable state law. • Other Individual Provider (OI): all other individual, non-facility providers not included in the definitions for Physicians, Dental Providers and PCP extenders. • Hospital (H) is defined as having a license type description of hospital as provided by the California Department of Public Health. A list of licensed hospitals can be found in the Covered California Data Dictionary – OSHPD List. For Provider Type = H, the first two characters of the NUCC taxonomy code should be 28. • Clinic (C) is defined as an organized outpatient health facility that provides direct medical, surgical, dental, optometric, or podiatric advice, services, or treatment to patients who remain less than 24 hours, and that may also provide diagnostic or therapeutic services to patients in the home as an incident to care provided at the clinic facility • Other Facility Provider (OF) is defined as: all other non-individual, facility providers not included in the definitions for Hospitals and Clinics. Examples include but are not limited to Pharmacies, Labs, Medical Groups etc.
Applicable To	Every record in the file
Max Length	2
Format / Type	Char / Coded Text
Acceptable Values	1. Physicians=" P", Dental Providers=" D", PCP extenders="PE", all other individual provider categories = "OI", Hospitals = "H", Clinics="C" and all other facility provider categories = "OF"

Provider_Type	
	2. "X" and "U" are <u>not</u> acceptable values
Structural Validation	<ol style="list-style-type: none"> 1. Subject to structural validation 2. "U" and "X" are not acceptable values and will be counted as null values for the purposes of structural validation
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Critical to the search of individual providers and hospitals (Provider Type = P, D and H) (D = DDS only). Providers will be categorized based on provider type and displayed online based on provider type classification. 2. If Provider Type = D, Covered California will only assess structural validation for dentists with a DDS license (Type of Licensure field populated with DDS). Dentists with other types of licensure will be filtered out prior to the structural validation process and therefore will not be displayed online.
Authority Sources	N/A
Data Consistency & Accuracy Validation	<ul style="list-style-type: none"> • Provider type is assessed against taxonomy and licensure where applicable. Covered California supplies a crosswalk of provider type, licensure and taxonomy in the Covered California Data Dictionary • Each provider type has an associated number of fields where input is required. In the future, required fields per provider type will be assessed for completeness
QHP FAQs	<ul style="list-style-type: none"> • Physicians should only be licensed MDs and DOs.
Examples	

NPI	
Technical Specifications	
Definition	National Provider Identifier (NPI) is a unique identification number for covered health care providers. The Federal Government mandated the use of only NPI for electronic healthcare transactions. The NPI number is issued under the direction of the Centers for Medicare & Medicaid Services (CMS)
Applicable to	Individual and Facility Providers (Provider_Type = "P", "D", "OI", "PE", "H", "C", "OF")
Max Length	10
Format / Type	Num / Unique ID
Acceptable Values	<ol style="list-style-type: none"> Must be 10 digit numeric with valid checksums. Null, "X" or "U" values must not exceed 1% of records
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> N/A – currently NPI is not displayed online NPI is used by Covered California as a key, unique identifier of individual providers
Authority Sources	National Plan & Provider Enumeration System (NPPES), refer to https://nppes.cms.hhs.gov for more information
Data Consistency & Accuracy Validation	<ol style="list-style-type: none"> NPI checksum validation: the 10th digit on the NPI number is a checksum. Each NPI will be assessed for validity via this checksum. Invalid NPIs will be flagged in the Detail Discrepancy File and a correction will be supplied if available. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File NPI type mismatch: NPI numbers are categorized into Type 1 for individuals and Type 2 for organizations. NPI numbers are assessed for category match. Mismatched NPIs will be flagged in the Detail Discrepancy File and a correction will be supplied if available. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File NPI active/deactivated status: NPI numbers are checked against the authority source. Deactivated NPIs are flagged in the Detail Discrepancy File and a correction will be supplied if available. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File NPI on NPPES: NPI numbers not verified on the NPPES authority source will be flagged in the Detail Discrepancy File and a correction will be supplied if available. Please refer to the User Guide for Provider Data Discrepancy Review for more details on how to locate this discrepancy in the Detail Discrepancy File Multiple NPIs associated with same CA License for individual providers: both should be unique to each provider One NPI associated with multiple CA Licenses: NPI has a one to many relationship with multiple CA Licenses for individual providers NPI registry name mismatch
Input Notes / FAQs	<ol style="list-style-type: none"> NPI for individual providers should be individual NPIs and not group or facility NPIs There should not be multiple NPIs to one CA License or multiple CA Licenses for one NPI. Also, individual NPIs should be associated with one name only
Examples	

CA_License	
Technical Specifications	
Definition	<ul style="list-style-type: none"> The professional license number is issued by the relevant licensing authority, e.g. one of the many licensing boards at the CA Department of Consumer Affairs The CA license is used to assure that health care providers are licensed to practice or to flag any restrictions in practice Non-CA State licensed providers are accounted for in separate fields
Applicable to	Individual and Facility Providers (Provider_Type = "P","D","OI", "PE", "H","C","OF")
Max Length	15
Format / Type	Char / Unique ID
Acceptable Values	<ol style="list-style-type: none"> For physicians (provider type "P" and type of licensure "MD"), the CA license must be in the following: "A","G" or "C" followed by sequence of digits with no spaces or leading zeros For physicians (provider type "P" and type of licensure "DO"), the CA license must be in the following: "20" followed by "A","G" or "C" followed by sequence of digits with no spaces or leading zeros License must be provided for all provider types "U" is an acceptable input for provider types "OI", "C" and "OF" (certain individuals or facilities may be certified but not licensed providers) "X" is an acceptable input for California facilities not licensed by the Department of Public Health (e.g. VA Hospitals)
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> Critical to identification of individual providers and determining active status, restrictions on practice and other information pertaining to individual providers and facilities Not displayed or searchable online
Authority Sources	<ol style="list-style-type: none"> Medical Board of California. Medical Board license info can be found at http://www.mbc.ca.gov/ Osteopathic Medical Board of California. PCP_Flag	
Technical Specifications	
Definition	Flag that indicates if provider is identified as a primary care provider/physician (PCP). A Primary Care Provider/Physician (PCP) is the main provider of care and coordinates all health care services and treatments in HMO products and may be matched to a member in PPO and EPO products. A provider's PCP status may vary by issuer or location.
Applicable to	Some Individual and Facility Providers (Provider_Type= "P","D","PE","C","OF")
Max Length	1
Format / Type	Char
Acceptable Values	<ol style="list-style-type: none"> 1. "Y" for PCP 2. "N" Non PCP 3. "X" is an acceptable value for provider types "D", "OI", "PE"
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Not visible to consumers or searchable online. May be added to directory as part of a PCP Selection functionality in the future.
Authority Source	QHP issuer designates PCPs when assigning or matching members
Consistency and Accuracy Validation	N/A
QHP FAQs	
Examples	

Network_ID	
Technical Specifications	
Definition	A unique identifier for each network product offered by each QHP. This important data element ties providers to specific network products by location (same provider may have different locations affiliated with different products or issuers)
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF") All detail records must have a Network ID
Max Length	11
Format / Type	Char / Coded Text
Acceptable Values	<ol style="list-style-type: none"> 1. Each network ID is a compilation of: <ul style="list-style-type: none"> • 5-digit HIOS (The Health Insurance Oversight System) number for QHP. Issued by the Center for Consumer Information and Insurance Oversight (CCIIO), a division of the Department of Health and Human Services (HHS) • The character string "CAN" • 3-digit numeric sequencer greater than 0 with leading zeros e.g. "001", "002" 2. "X" and "U" are <u>not</u> acceptable values 3. Please refer to Appendix I for a table of Network IDs for QHPs participating in the Exchange for PY
Structural Validation	<ol style="list-style-type: none"> 1. Subject to structural validation 2. "U" and "X" are <u>not</u> acceptable values and will be counted as null values for the purposes of structural validation
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Critical for attribution of providers to specific products and networks at the location level 2. Critical for members to identify and search for preferred providers affiliated with their chosen networks
Authority Source	QHP
Consistency and Accuracy Validation	<ol style="list-style-type: none"> 1. Network IDs not included in the Network IDs Appendix I will be considered null and the associated records may be disregarded 2. Special accommodations will be made for new entrant QHPs seeking entry into the marketplace during the annual certification process. See Appendix IV
QHP FAQs	Accurate attribution of providers is imperative and records without a network identifier may be disregarded
Examples	12345CAN003

Network_Tier_ID	
Technical Specifications	
Definition	Flag to indicate if certain providers are offered via special referral with a higher cost share than regular in network providers. This would apply to in-network providers that are on a different tier or that require additional prior authorization. This is at the discretion of the QHP. As of Plan Year 2017, Covered California will no longer allow tiering of network products offered on the Exchange. This field may be repurposed in the future.
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF")
Max Length	1
Format / Type	Num / Coded Text
Acceptable Values	<ol style="list-style-type: none"> 1. "1" = Tier 1 provider 2. "2" = Tier 2 provider offered at a higher cost share than regular in-network providers 3. "X" and "U" are <u>not</u> acceptable values
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Not critical for directory functionality. Not visible to consumers or searchable online. 2. Critical to Covered California for network analysis
Authority Source	QHP
Consistency and Accuracy Validation	N/A
QHP FAQs	N/A
Examples	

Availability	
Technical Specifications	
Definition	Flag to indicate if certain providers are offered via special referral or prior authorization with same cost share as in-network providers. This would apply to in-network providers that are on a different tier or that require additional prior authorization. This is at the discretion of the QHP and is to allow reporting of all network providers while disclosing providers that may not be as readily accessible as others in the network to Covered California.
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF")
Max Length	1
Format / Type	Char / Boolean
Acceptable Values	<ol style="list-style-type: none"> "Y" = Available to Covered California members without any special referral, prior authorization or any other restriction "N" = Special authorization or referral of any kind required "X" and "U" are <u>not</u> acceptable values
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> Not critical for directory functionality. Not visible to consumers or searchable online. Critical to Covered California for network analysis
Authority Source	QHP
Consistency and Accuracy Validation	N/A
QHP FAQs	N/A
Examples	

Visibility	
Technical Specifications	
Definition	Flag to indicate if certain providers should not be displayed on the online directory despite being part of the network. This would apply to in-network providers that are on a different tier or that require additional prior authorization. This is at the discretion of the QHP and is aimed to minimize confusion or misrepresentation of availability of providers to consumers
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF")
Max Length	1
Format / Type	Char / Boolean
Acceptable Values	<ol style="list-style-type: none"> 1. "Y" = Visible on online directory 2. "N" = Not visible on online directory 3. "X" and "U" are <u>not</u> acceptable values
Structural Validation	<ol style="list-style-type: none"> 1. Subject to structural validation 2. The Invalid Visibility structural validation checks ensure that an Issuer's entire file is not set to Visibility = No. An input file will only fail if the Visibility field = No for 100% of provider types P, D or H.
Business Context / Specifications	
Relevance to Multi-Plan Directory	<ol style="list-style-type: none"> 1. Critical for defining which providers should be displayed in the online directory. 2. Not visible to consumers or searchable online.
Authority Source	QHP

Examples	

Covered_California_ID	
Technical Specifications	
Definition	Unique identifier assigned by Covered California to Essential Community Provider (ECP) hospitals and clinics as per Covered California’s ECP definition and is listed on the annually updated ECP Reference List
Applicable to	Some Individual and Facility Providers (Provider_Type= "H","C","OF")
Max Length	16
Format / Type	Char / Unique ID
Acceptable Values	1. Unique 16-digit identifier can be found on the reference list for ECPs 2. "X" is an acceptable value for provider types "D", "OI","PE","P"
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Critical for QHP contract compliance
Authority Source	Covered California’s ECP Reference list which can be found at http://hbex.coveredca.com/stakeholders/plan-management/ecp-list/
Consistency and Accuracy Validation	Must conform with ECP_Flag and Type_of_Service
QHP FAQs	This data element is crucial for identifying ECP facilities in addition to Covered_California_ID and Type_of_Service. All three must be adequately populated for ECPs to be documented as being in-network for an issuer
Examples	

ECP_Flag	
Technical Specifications	
Definition	Flag that indicates if provider is identified as an Essential Community Provider (ECP) as per Covered California’s ECP definition and is listed on the annually updated ECP Reference List
Applicable to	Some Individual and Facility Providers (Provider_Type= "P","H","C","OF")
Max Length	1
Format / Type	Char / Boolean
Acceptable Values	1. "Y" for ECP. "N" Non ECP 2. "X" is an acceptable value for provider types "D", "OI","PE"
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Critical for QHP contract compliance
Authority Source	Covered California’s ECP list http://hbex.coveredca.com/stakeholders/plan-management/ecp-list/
Consistency and Accuracy Validation	Must conform with Covered_California_ID and Type_of_Service
QHP FAQs	This data element is crucial for identifying ECP facilities in addition to Covered_California_ID. Must be adequately populated for ECPs to be documented as being in-network for an issuer
Examples	

Accepting_New_Patients	
Technical Specifications	
Definition	Flag that indicates if primary care provider or matched physician (PPO or EPO products) are accepting new patients for assignment or matching. Panel status may vary by location or network affiliation for the same provider.
Applicable to	Some Individual and Facility Providers (Provider_Type= "P","D","PE","C","OF")
Max Length	1
Format / Type	Char / Boolean
Acceptable Values	<ol style="list-style-type: none"> "Y" for accepting new patient assignments or matching. "N" for not accepting new patient assignments or matching or accepting patients in a restricted or limited manner "X" is an acceptable value for provider types "H", "OI" "U" is <u>not</u> an acceptable value for provider types "P","D","PE","C","OF"
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Not visible to consumers or searchable online. Likely to be added to provider search functionality in future iterations due to the importance of panel status to member experience.
Authority Source	QHP
Consistency and Accuracy Validation	N/A
QHP FAQs	Panel status may vary by location or network affiliation for the same provider
Examples	

Snapshot_Date	
Technical Specifications	
Definition	Year, month and day data was last cut, extracted or captured for this submission
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF")
Max Length	10
Format / Type	Char / Date
Acceptable Values	<ol style="list-style-type: none"> Must be in MM/DD/YYYY format "X" and "U" are <u>not</u> acceptable values
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Critical for comparison and archiving of data over time
Authority Source	QHP
Consistency and Accuracy Validation	This date must coincide with correct snapshot date (Extract Date) defined by Covered California in the submission schedule (distributed separately)
QHP FAQs	N/A
Examples	

Issuer_Provider_ID	
Technical Specifications	
Definition	A QHPs internally assigned identifier for contracted providers
Applicable to	Individual and Facility Providers (Provider_Type= "P","D","PE","OI","H","C","OF")
Max Length	35
Format / Type	Char / Unique ID
Acceptable Values	<ol style="list-style-type: none"> Any alphanumeric identifier under 35 characters in length Special characters other than pipe delimiters are acceptable "X" is an acceptable value in its absence.
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Critical for provider matching and attribution
Authority Source	QHP
Consistency and Accuracy Validation	N/A
QHP FAQs	
Examples	

Issuer_PCP_ID	
Technical Specifications	
Definition	A QHPs internally assigned identifier for primary care providers
Applicable to	Some Individual and Facility Providers (Provider_Type= "P","D","PE","C","OF")
Max Length	35
Format / Type	Char / Unique ID
Acceptable Values	<ol style="list-style-type: none"> Any alphanumeric identifier under 35 characters in length. Special characters other than pipe delimiters are acceptable "X" is an acceptable value in its absence
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	Critical for provider matching and attribution
Authority Source	QHP
Consistency and Accuracy Validation	N/A
QHP FAQs	Only to be supplied for providers assigned patients as a primary care provider or matched primary care physician (for PPO and EPO products) if available.
Examples	

Record_Type	
Technical Specifications	
Definition	Record type identifier
Applicable to	Both Individual and Facility Providers
Max Length	1
Format / Type	Char / Hardcoded
Acceptable Values	Hardcoded to “D”
Structural Validation	N/A
Business Context / Specifications	
Relevance to Multi-Plan Directory	N/A
Authority Source	N/A
Consistency and Accuracy Validation	N/A
QHP FAQs	Must be attached to each record
Examples	

Appendix I:

A. QHP Network IDs for PY 2025

Network ID is a combination of 5-digit HIOS number for issuer + CAN00# sequence. A different sequence number is generated for each product offered on the Exchange. This ID specifies the product that each provider participates in for a given QHP Issuer.

QHP Issuer	Product	Market	Network ID
Aetna Health	HMO	Individual	20523CAN004
Anthem Blue Cross	EPO	Individual	27603CAN001
Anthem Blue Cross	HMO	Individual	27603CAN003
Blue Shield of California	PPO	Individual	70285CAN001
Blue Shield of California	HMO	Individual	70285CAN011
Blue Shield of California	PPO	CCSB	70285CAN009
Blue Shield of California	HMO	CCSB	70285CAN010
CCHP	HMO	Individual	47579CAN001
Health Net CA	HMO	Individual	67138CAN001
Health Net CA	PPO	Individual	67138CAN003
Inland Empire Health Plan	HMO	Individual	51396CAN001
Kaiser Permanente	HMO	Individual	40513CAN001
Kaiser Permanente	HMO	CCSB	40513CAN001
L.A. Care Health Plan	HMO	Individual	92815CAN001
Molina Health Care	HMO	Individual	18126CAN001
Sharp Health Plan	HMO	Individual	92499CAN001
Sharp Health Plan	HMO	Individual	92499CAN002
Sharp Health Plan	HMO	CCSB	92499CAN001
Sharp Health Plan	HMO	CCSB	92499CAN002
Valley Health Plan	HMO	Individual	84014CAN001
Western Health Advantage	HMO	Individual	93689CAN001

B. QDP Network IDs for PY 2025

Network ID is a combination of 5-digit HIOS number for issuer + CAN00# sequence. A different sequence number is generated for each product offered on the Exchange. This ID specifies the product that each provider participates in for a given QDP issuer.

QDP Issuer	Product	Market	Network ID
Anthem Blue Cross Dental	DPPO	Individual (F)	27603CAN004
Anthem Blue Cross Dental	DHMO	Individual (F)	27063CAN005
Blue Shield of California	DPPO	Individual (F)	70285CAN002
Blue Shield of California	DHMO	Individual (F)	70285CAN003
California Dental Network	DHMO	Individual (C+F)	97389CAN001
California Dental Network	DHMO	CCSB (C+F)	97389CAN001
Delta Dental	DPPO	Individual (F)	62683CAN001
Delta Dental	DHMO	Individual (F)	62683CAN003
Delta Dental	DPPO	CCSB (C+F)	62683CAN002
Delta Dental	DHMO	CCSB (C+F)	62683CAN004
Humana	DPPO	Individual (F)	68744CAN001

Appendix II:

Covered California Rating Regions and Associated Counties

To assign a Rating Region to a record, use the County-ZIP code combinations within the ZIP Code Reference List in the Covered California Data Dictionary.

Rating Region	County	Rating Region	County
Region 1	Alpine	Region 4	San Francisco
	Amador	Region 5	Contra Costa
	Butte	Region 6	Alameda
	Calaveras	Region 7	Santa Clara
	Colusa	Region 8	San Mateo
	Del Norte	Region 9	Monterey
	Glenn		San Benito
	Humboldt		Santa Cruz
	Lake	Region 10	Mariposa
	Lassen		Merced
	Mendocino		San Joaquin
	Modoc		Stanislaus
	Nevada		Tulare
	Plumas	Region 11	Fresno
	Shasta		Kings
	Sierra		Madera
	Siskiyou	Region 12	San Luis Obispo
	Sutter		Santa Barbara
	Tehama		Ventura
	Trinity	Region 13	Imperial
Tuolumne	Inyo		
Yuba	Mono		
Region 2	Marin	Region 14	Kern
	Napa	Region 15	Los Angeles (east)
	Solano	Region 16	Los Angeles (west)
	Sonoma	Region 17	Riverside
El Dorado	San Bernardino		
Region 3	Placer	Region 18	Orange
	Sacramento	Region 19	San Diego
	Yolo		

Appendix III: Definition of terms used in this document

- **Data Dictionary:** A centralized repository of information about data such as meaning, relationships to other data, origin, usage, and format.
- **Data Element:** A unit of data for which the definition, identification, representation, and permissible values are specified by means of a set of attributes. Equivalent in this context to a field in a table.
- **Data Field:** Commonly used to refer to a column in a database or a field in a data entry form or web form. The field may contain data to be entered as well as data to be displayed.
- **Data Type:** A data storage format that can contain a specific type or range of values. e.g., coded text, numeric string, unique identifier, integer, Boolean, etc.
- **DEA:** Drug Enforcement Administration www.dea.gov
- **Doctor of Medicine (MD or DM):** Or in Latin: Medicinae Doctor, meaning "Teacher of Medicine", is a terminal degree for physicians and surgeons. A Doctor of Medicine (MD) has attended and graduated from a conventional (allopathic) medical school. In countries that follow the tradition of the United States, it is a first professional graduate degree awarded upon graduation from medical school.
- **Doctor of Osteopathic Medicine (DO):** A fully trained and licensed doctor who has attended and graduated from a United States osteopathic medical school.
- **ECP (Essential Community Provider):** Providers that serve predominantly low-income, medically underserved individuals, and specifically include providers described in section 340B of the Public Health Service Act and the Social Security Act. Covered California may have ECP criteria that differ from the Federal Marketplace.
- **EPO (Exclusive Provider Organization):** A type of health insurance plan that offers a full array of covered benefits from a single network of participating doctors and hospitals. A PCP is usually not required (but encouraged), and members can see a specialist without a referral from a PCP. Out of network services are not covered except in the case of emergency.
- **HIOS:** Health Insurance Oversight System, the federal government's primary data collection vehicle for health insurance "Exchanges" Marketplaces. One function of HIOS is to collect data from health plan issuers that want to become certified qualified health plan issuers.
- **HMO (Health Maintenance Organization):** A type of health insurance plan that usually limits coverage to care from doctors who work for or contract with the HMO. It generally won't cover out-of-network care except in an emergency. An HMO may require you to live or work in its service area to be eligible for coverage. HMOs often provide integrated care and focus on prevention and wellness. Members are required to have a primary care physician (PCP), and a referral is required to see a specialist.
- **Hospital Based Physician:** A physician who provides clinical support for patient management, performing medical services within a hospital and includes Radiologists, Pathologists, Emergency Department Physicians, Intensivists, those specializing in Nuclear Medicine, and Hospitalists.
- **Hospitalist:** A dedicated in-patient physician who works exclusively in a hospital and whose primary professional focus is the general medical care of hospitalized patients. Hospitalists generally specialize in Internal Medicine, Family Medicine.
- **Issuer:** An insurance company, insurance service, or insurance organization (including a health maintenance organization, which is licensed to engage in the business of insurance in a State and which is subject to State law which regulates insurance).
- **LexisNexis Provider Point:** A hosted data cleansing service based on an MPRD maintained by LexisNexis.

- **MPRD (Master Provider Referential Database):** A database containing all data pertaining to providers used to conduct verification, de-duplication, and augment provider files.
- **Network:** List of providers, facilities contracted to provide health care services to plan members. These providers have agreed to see members under certain rules, including billing at contracted rates.
- **Network Tier:** Providers and facilities associated with a particular cost-sharing level in a network in which different providers and facilities are associated with different cost-sharing levels within a single network. **NUCC (National Unified Claims Committee):** www.nucc.org A Committee created to develop a standardized data set for use by the non-institutional health care community to transmit claim and encounter information to and from all third-party payers.
- **HCAI (Department of Health Care Access and Information) :** hcai.ca.gov (Formerly Office of Statewide Health Planning and Development) The collection of data and disseminating information about California’s healthcare infrastructure.
- **PCP (Primary Care Physician):** A primary care physician is a specialist in Family Medicine, Internal Medicine, Gynecology, General Practice, or Pediatrics, who provides definitive care to the undifferentiated patient at the point of first contact and takes continuing responsibility for providing the patient's comprehensive care. This care may include chronic, preventive, and acute care in both inpatient and outpatient settings.
- **PPO (Preferred Provider Organization):** A type of health insurance plan that contracts with participating doctors and hospitals to create a network. You pay less if you use doctors and hospitals that belong to the plan’s network. You can use doctors, hospitals and others outside the network for an additional cost. A PCP is usually not required (but encouraged), and members can see a specialist without a referral from a PCP.
- **Product:** A discrete package of health insurance coverage benefits that are offered using a particular product network type (such as health maintenance organization, preferred provider organization, exclusive provider organization, point of service, or indemnity) within a service area.
- **QDP (Qualified Dental Plan):** An insurance plan that is certified by the Health Insurance Marketplace, meets Affordable Care Act requirements, and provides dental benefits.
- **QHP (Qualified Health Plan):** An insurance plan that is certified by the Health Insurance Marketplace and meets Affordable Care Act requirements such as coverage of essential health benefits.
- **Record:** A basic data structure. A record is a collection of fields, possibly of different data types, typically in fixed number and sequence. Equivalent to a row on a table.
- **Specialty:** A branch of medical practice. After completing medical school, physicians, or surgeons usually further their medical education in a specific specialty of medicine by completing a multiple year residency to become a medical specialist.
- **Taxonomy:** In the context of this document, taxonomy refers to a hierarchical code set that consists of codes, descriptions, and definitions. Healthcare Provider Taxonomy Codes are designed to categorize the type, classification, and/or specialization of health care providers. Each taxonomy code is a 10-character alphanumeric string.

[Back to Contents](#)

Appendix IV: Using the Provider Data Submission Guide for Application and Certification

Covered California requires all current and prospective Issuers to submit a provider roster file for the coming PY as part of an annual certification process. Currently certified QHP Issuers and new entrants should use the Covered California Provider Data Submission Guide to create a submission file with the same data fields for annual certification. However, there are a few key differences between the monthly Provider Data Submission file and the annual certification provider roster file:

- The annual certification file should be for the coming plan year and not the current month. For example, a QHP Issuer applying for certification for PY 2026 must submit a file depicting 2026 networks during the certification period which occurs mid-2025. Issuers should consider any service area and network changes for the coming PY in the certification file.
- The annual certification file is not submitted via the regular Issuer-hosted SFTP or the Covered California Extranet. Please refer to the certification instructions for the appropriate channel to submit the certification provider roster file.
- The Network IDs in the annual certification file must match the Network ID submitted in the applicants SERFF Network templates and the Network IDs in your monthly data submissions. Guidelines for assigning Network IDs in the SERFF template are below:

Issuers new to Covered California should use a combination of the 5 digit HIOS number and one of the following sequences to create a Network ID. Current Issuers seeking approval to offer new network products through Covered California during the annual certification process should create Network IDs and submit them to Covered California for approval. The Network ID is an important data element that defines a provider’s network participation and once approved, has to be included in every submitted provider record.

Type of Network-Product	Sequence
Individual Market Medical PPO or Dental PPO Network	CAN001
Individual Market Medical EPO or Dental EPO Network	CAN002
Individual Market Medical HMO or Dental HMO Network	CAN003
CCSB Market Medical PPO or Dental PPO Network	CAN001
CCSB Market Medical EPO or Dental EPO Network	CAN002
CCSB Market Medical HMO or Dental HMO Network	CAN003

An example network ID would be 12345CAN001. If the Issuer intends to offer two or more products with the same network design in the same area, the sequential number can be extended to CAN007, CAN008 and beyond, up to the required number. If the Issuer offers the same product and provider network in both the Individual and Small Business market, the same Network ID should be used.

A list of PY (2025) Network IDs approved to offer coverage through Covered California can be found in Appendix I. This list will be updated annually post certification to accommodate changes in the network offerings.

The following file naming standard should be followed by Issuers on the input files submitted to Covered California for certification purposes only:

File	Certification Naming Convention
Medical Provider Roster Files	CE_MM_YYYY_ISSUERID_QHP_CC.TXT
Dental Provider Roster Files	CE_MM_YYYY_ISSUERID_QDP_CC.TXT

ISSUERID = Issuer HIOS number.

MM_YYYY = Month and year of submission for certification application.

Example: CE_05_2025_12345_QHP_CC.TXT
