1 Application Overview

1.1 **Purpose**

The California Health Benefit Exchange (Covered California) is accepting applications from eligible Health Insurance Issuers (Applicants or Health Issuer) to submit proposals to offer, market, and sell Qualified Health Plans (QHPs) through Covered California beginning in 2024, for coverage effective January 1, 2025. All Health Insurance Issuers currently licensed at the time of application response submission are eligible to apply for certification of proposed Qualified Health Plans (QHPs) for Plan Year 2025. Covered California will exercise its statutory authority to selectively contract for health care coverage offered through Covered California for Plan Year 2025. Covered California reserves the right to select or reject any Applicant or to cancel this Application at any time.

1.2 **Background**

Soon after the passage of national health care reform through the Patient Protection and Affordable Care Act of 2010 (ACA), California enacted legislation to establish a qualified health benefit exchange. (California Government Code § 100500 et seq.) The California state law is referred to as the California Patient Protection and Affordable Care Act (CA-ACA).

Covered California offers a statewide health insurance exchange to make it easier for individuals to compare plans and buy health insurance in the private market. Although the focus of Covered California is on individuals who qualify for tax credits and subsidies under the ACA, Covered California's goal is to make insurance available to all qualified individuals. The vision of Covered California is to improve the health of all Californians by assuring their access to affordable, high quality care coverage. The mission of Covered California is to increase the number of insured Californians, improve health care quality, lower costs, and reduce health disparities through an innovative, competitive marketplace that empowers consumers to choose the health plan and providers that give them the best value.

Covered California is guided by the following values:

Consumer-Focused: At the center of Covered California's efforts are the people it serves. Covered California will offer a consumer-friendly experience that is accessible to all Californians, recognizing the diverse cultural, language, economic, educational and health status needs of those it serves.

Affordability: Covered California will provide affordable health insurance while assuring quality and access.

Catalyst: Covered California will be a catalyst for change in California's health care system, using its market role to stimulate new strategies for providing high-quality, affordable health care, promoting prevention and wellness, and reducing health disparities.

Integrity: Covered California will earn the public's trust through its commitment to accountability, responsiveness, transparency, speed, agility, reliability, and cooperation.

Transparency: Covered California will be fully transparent in its efforts and will make opportunities available to work with consumers, providers, health plans, employers, purchasers, government partners, and other stakeholders to solicit and incorporate feedback into decisions regarding product portfolio and contract requirements.

> **Results:** The impact of Covered California will be measured by its contributions to decrease the number of uninsured, have meaningful plan and product choice in all regions for consumers, improve access to quality healthcare, promote better health and health equity, and achieve stability in healthcare premiums for all Californians.

In addition to being guided by its mission and values, Covered California's policies are derived from the federal ACA which calls upon Exchanges to advance “plan or coverage benefits and health care provider reimbursement structures" that improve health outcomes. Covered California seeks to improve the quality of care while moderating cost not only for the individuals enrolled in its plans, but also by being a catalyst for delivery system reform in partnership with plans, providers, and consumers. With the Affordable Care Act and the range of insurance market reforms that are in the process of being implemented, the health insurance marketplace is transforming from one that has prioritized profitability through a focus on risk selection, to one that rewards better care, affordability, and prevention.

Covered California needs to address these issues for the millions of Californians who enroll through Covered California to get coverage, but it is also part of broader efforts to improve care, improve health, and stabilize rising health care costs throughout the state.

Covered California must operate within the federal standards in law and regulation. Beyond what is framed by the federal standards, California's legislature shapes the standards and defines how the new marketplace for individual and small group health insurance operates in ways specific to their context. Within the requirements of the minimum Federal criteria and standards, Covered California has the responsibility to "certify" the Qualified Health Plans that will be offered in Covered California.

The state legislation to establish Covered California gave authority to Covered California to selectively contract with Issuers to provide health care coverage options that offer the optimal combination of choice, value, quality, and service, and to establish and use a competitive process to select the participating health Issuers. To this end, Covered California only certifies those Applicants who demonstrate a clear value proposition to its consumers, both in terms of quality and price; in addition, QHPs already operating on the Exchange must maintain quality scores that meet or exceed established benchmarks and reduce health disparities, or risk being removed from the Exchange.

These concepts, and the inherent trade-offs among Covered California values, must be balanced in the evaluation and selection of the Qualified Health Plans (QHPs) that will be offered on the Individual Exchange.

This application has been designed consistent with the policies and strategies of the California Health Benefit Exchange Board which calls for the QHP selection to influence the competitiveness of the market, the cost of coverage, and how value is added through health care delivery system improvement.

1.3 **Application Evaluation and Selection**

The evaluation of QHP Certification Applications will not be based on a single, strict formula; instead, the evaluation will consider the mix of health plans for each region of California that

best meets the needs of consumers in that region and Covered California's goals. Covered California wants to provide an appropriate range of high-quality health plans to participants at the best available price that is balanced with the need for consumer stability and long-term affordability. In consideration of the mission and values of Covered California, the Board of Covered California articulated guidelines for the selection and oversight of Qualified Health Plans which are used when reviewing the Applications. These guidelines are:

Promote Affordability and Value for the Consumer - Both in Premiums and at Point of Care

While premiums will be a key consideration, contracts will be awarded based on the determination of "best value" to Covered California and its participants. Covered California seeks to offer health plans, plan designs and provider networks that are as affordable as possible to consumers, both in premiums and cost sharing, while fostering competition and stable premiums. Covered California will seek to offer health plans, products, and provider networks that will attract maximum enrollment as part of its effort to lower costs by spreading risk as broadly as possible.

Encourage Competition Based upon Quality

The evaluation of Issuer QHP proposals will focus on quality and service components, including history of performance, administrative capacity, reported quality and satisfaction metrics, quality improvement plans and commitment to serve Covered California population. The application responses, in conjunction with the approved filings, will be evaluated by Covered California and used as part of the selection criteria to offer Issuers' products on Covered California for the certification year. In addition, supplemental contracted provider network data will be used to predict the likely quality of new entrant QHPs to ensure that new entrants are held to the same quality standards as existing QHPs. Proposed provider networks will be evaluated using provider-organization quality data, hospital quality data, and health plan quality results including NCQA commercial and Medicaid HEDIS measure results and QRS Marketplace measure results from other states.

Encourage Competition Based upon Meaningful QHP Choice and Product Differentiation: Patient-Centered Benefit Plan Designs[1]

Covered California is committed to fostering competition by offering QHPs with features that present clear choice, product, and provider network differentiation. QHP Applicants are required to adhere to Covered California's standard benefit plan designs in each region for which they submit a proposal. In addition, QHP Applicants may offer Covered California's standard Health Savings Account-eligible (HSA) High Deductible Health Plan (HDHP) designs. Applicants may choose to offer either or both Gold and Platinum standard benefit plan designs if there is differentiation between two plans in the same metal tier that is related to either product, network or both or an additional benefit explained. Covered California is interested in having Health Maintenance Organization (HMO), Exclusive Provider Organization (EPO), Preferred Provider Organization (PPO), and other products offered statewide. Within a given product design, Covered California

1 The certification year Patient-Centered Benefit Plan Designs will be finalized when the certification year federal actuarial calculator is finalized.

will look for differences in network providers and the use of innovative delivery models. Under such criteria, Covered California may choose not to contract with two plans with broad overlapping networks within a rating region unless they offer different innovative delivery system or payment reform features.

Encourage Competition throughout the State

Issuers must submit QHP proposals in all geographic service areas in which they are licensed and have an adequate network, and preference will be given to Issuers that develop QHP proposals that meet quality and service criteria while offering coverage options that provide reasonable access to the geographically underserved areas of the state.

Demonstrate Administrative Capability and Financial Solvency

Covered California will review and consider Applicant's degree of financial risk to avoid potential threats of failure which would have negative implications for continuity of patient care and for the healthcare system. Applicant's technology capability is a critical component for success for Covered California, so Applicant's technology and associated resources are heavily scrutinized as this relates to long-term sustainability for consumers. Application responses that demonstrate a commitment to the long-term success of Covered California's mission are strongly encouraged.

Encourage Robust Customer Service

Covered California is committed to ensuring a positive consumer experience, which requires Issuers to maintain adequate resources to meet consumers' needs. To successfully serve Covered California consumers, Issuers must invest in and sustain adequate staffing, including hiring of bilingual and bicultural staff as appropriate and maintaining internal training as needed. Issuers demonstrating a commitment to dedicated administrative resources for Covered California consumers will receive additional consideration.

1.4 **Availability**

Applicant must be available immediately upon contingent certification of its plans as QHPs to start working with Covered California to establish all operational procedures necessary to integrate and interface with Covered California information systems and to provide additional information necessary for Covered California to market, enroll members, and provide health plan services effective January 1, 2025. Successful Applicants will also be required to adhere to certain provisions through their contracts with Covered California, including meeting data interface requirements with the Covered California for Small Business Enrollment System.. Successful Applicants must execute the QHP Issuer Contract before public announcement of contingent certification. Failure to execute the QHP Issuer Contract may preclude Applicant from offering QHPs through Covered California. The successful Applicants must be ready and able to accept enrollment as of October 1, 2024.

This section not required if Applicant has completed the Certification Application Qualified Health Plan Application Individual Marketplace Plan Year 2025.

All questions are required for new entrant Applicants. All questions should be answered at the Issuer level, not product level.

To fulfill its mission to ensure that consumers have available the plans that offer the optimal combination of choice, value, quality, and service, Covered California relies on evidence about the enrollee experience with health care. The timely and accurate submission of QHP data is an essential component of assessing the quality and value of the coverage and health care received by Covered California enrollees. QHP Issuers are required by state law to submit data described by this section. The file layout which details current expectations of requested data is available for review on the Manage Documents page as Appendix H_QHP-IND-CCSB_HEI Extract File Specs. Covered California will consider modifications to the layout when appropriate.

The data elements required to be submitted pursuant to this application, and the resulting QHP Issuer contract, will include the personal information of enrollees and Applicant’s proprietary rate information. Covered California will, and is required by law, to protect and maintain the confidentiality of this information, which shall at all times be subject to the same stringent 350-plus security and privacy-related requirements as other personal information within Covered California’s custody or control.

14.1 Applicant must demonstrate that its QHP proposals meet requirements for geographic sufficiency of its Essential Community Provider (ECP) network. Covered California will use the provider network data submission to assess Applicant's ECP network. All the criteria below must be met.

1. Applicants must demonstrate sufficient geographic distribution of a mix of essential community providers reasonably distributed throughout the geographic service area; **AND**
2. Applicants must demonstrate contracts with at least 15% of 340B entities (where available) throughout each rating region in the proposed geographic service area; **AND**
3. Applicants must include at least one ECP hospital (including but not limited to 340B hospitals, Disproportionate Share Hospitals, critical access hospitals, academic medical centers, county, and children's hospitals) per each county in the proposed geographic service area - where they are available.
4. Covered California will evaluate the application of all three criteria to determine whether Applicant's essential community provider network has achieved the sufficient geographic distribution and balance between hospital and non-hospital requirements. The above are the minimum requirements. For example, in populous counties, one ECP hospital will not suffice if there are concentrations of low-income population throughout the county that are not served by a single contracted ECP hospital.

Federal regulations currently require Health Issuers to adhere to rules regarding payment to non-contracted FQHCs for services when those services are covered by the QHP's benefit plan. Health Issuers will be required, in their contract with Covered California, to operate in compliance with all federal regulations issued pursuant to the Affordable Care Act, including those applicable to ECPs.

Essential Community Providers include those providers posted in the Covered California Consolidated Essential Community Provider List available at: http://hbex.coveredca.com/stakeholders/plan-management/ecp-list/

Covered California will calculate the percentage of contracted 340B entities located in each rating region of the proposed geographic service area. All 340B entity service sites shall be counted in the denominator, in accordance with the most recent version of Covered California's Consolidated ECP list.

Categories of Essential Community Providers:

Essential Community Providers include the following:

1. The Center for Medicare & Medicaid Services (CMS) non-exhaustive list of available 340B providers in the PHS Act and section 1927(c)(1)(D)(i)(IV) of the Social Security Act.
2. Facilities listed on the California Disproportionate Share Hospital Program, Final DSH Eligibility List
3. Federally designated 638 Tribal Health Programs and Title V Urban Indian Health Programs
4. Community Clinics or health centers licensed as either “community clinic” or “free clinic”, by the State of California under Health and Safety Code section 1204(a), or operating as a community clinic or free clinic exempt from licensure under Section 1206
5. Physician Providers with approved applications for the HI-TECH Medi-Cal Electronic Health Record Incentive Program
6. Federally Qualified Health Centers (FQHCs)

Low-income is defined as a family at or below 200% of Federal Poverty Level. The ECP data supplied by Applicant will allow Covered California to plot contracted ECPs on maps to compare contracted providers against the supply of ECPs and the distribution of low-income Covered California enrollees.

Alternate standard:

Applicants that provide a majority of covered professional services through physicians employed by the issuer or through a single contracted medical group may request to be evaluated under the “alternate standard.” The alternate standard requires Applicant to have a sufficient number and geographic distribution of employed providers and hospital facilities, or providers of its contracted integrated medical group and hospital facilities to ensure reasonable and timely access for low-income, medically underserved individuals in the QHP's service area, in accordance with Covered California's network adequacy standards.

To evaluate an Applicant's request for consideration under the alternate standard, submit a written description of the following:

1. Percent of services received by Applicant's members which are rendered by Applicant's employed providers or single contracted medical group; **AND**
2. Degree of capitation Applicant holds in its contracts with participating providers. What percent of provider services are at risk under capitation; **AND**

3. How Applicant's network is designed to ensure reasonable and timely access for low-income, medically underserved individuals; **AND**
4. Efforts Applicant will undertake to measure how/if low-income, medically underserved individuals are accessing needed health care services (e.g., maps of low-income members relative to 30-minute drive time to providers; survey of low-income members experience such as CAHPS “getting needed care” survey).

Applicant to produce access map to demonstrate location of low income, medically underserved population(s) in Applicants proposed service area and their access to health care services. Low income, vulnerable, or medically underserved individuals shall be defined as those individuals who fall below two hundred percent (200%) of the FPL. Maps shall demonstrate the extent to which provider sites are accessible to and have services that meet the needs of specific underserved populations, including:

1. Individuals with HIV/AIDS
2. American Indians and Alaska Natives
3. Low income and underserved individuals seeking women's health and reproductive health services
4. Other specific populations served by Essential Community Providers in the service area such as STD Clinics, Tuberculosis Clinics, Hemophilia Treatment Centers, Black Lung Clinics, and other entities that serve predominantly low income, medically underserved individuals.

If existing provider capacity does not meet the above criteria, Applicant may be required to provide additional contracted or out-of-network care. Applicants are encouraged to consider contracting with identified ECPs to provide reasonable and timely access for low-income, medically underserved communities.

15 Health Equity and Quality Transformation

Attachment 1 of the Covered California for Small Business Qualified Health Plan (QHP) Issuer Contract delineates Covered California’s vision for reform and serves as a roadmap for delivery system improvements. Beginning with the 2017 QHP Issuer Contract, QHP Issuers have been engaged in supporting existing quality improvement initiatives and programs that are sponsored by other major purchasers including the Department of Health Care Services (DHCS), the California Public Employees’ Retirement System (CalPERS), the Purchaser Business Group on Health (PBGH), and CMS. These requirements are reflected in the 2017-2022 QHP Issuer contract and have been revised and enhanced in the 2023-2025 QHP Issuer contract. QHP certification and participation in Covered California will be conditional on Applicant developing a multi-year strategy, and reporting year-to-year activities and progress on each of the initiative areas below.

If Applicants that are currently operating in Covered California have the same provider network for both the Individual Marketplace and the Small Business Marketplace, Covered California recognizes the responses may be the same or similar for both markets.

15.5.3 Health-Related Social Needs

Given the strong evidence of the role of social factors like food insecurity, marginal housing, and lack of transportation on health outcomes, addressing health-related social needs ("social needs") is an important step in advancing Covered California's goal to ensure everyone receives the best possible care. Covered California acknowledges the importance of understanding patient health-related social needs – an individual's socioeconomic barriers to health – to move closer to equitable care and seeks to encourage the use of social needs informed and targeted care. As social needs are disproportionately borne by disadvantaged populations, identifying, and addressing these barriers at the individual patient level is a critical first step in improving health outcomes, and reducing health disparities. Identification and information sharing of available community resources is critical to meeting identified member social needs.

15.5.4 Prevention of Algorithmic Bias in Healthcare

The potential for bias in algorithms used in decisions to allocate health care resources is increasingly documented. For example, algorithms using cost and utilization data to assess risk and allocate health care services or other resources will exacerbate existing disparities in access to health care by prioritizing those patient populations utilizing services for receipt of additional support. Processes and systems to identify and address these biases are critical to an equitable population health management strategy and preventing exacerbation of existing health disparities.

Covered California recommends referring to the Chicago Booth Center for Applied Artificial Intelligence Algorithmic Bias Playbook for an explanation of algorithmic bias and steps health care services entities can take to identify and address bias in algorithms in use and implement best practices for use of algorithms. The questions in this section 15.5.4 refer to the Playbook's four step process to address potential bias in algorithms.

15.8 Data Sharing and Exchange

This section not required if Applicant has completed the Qualified Health Plan Application Plan Year 2025 Individual Marketplace.

All questions are required for new entrant Applicants. All questions should be answered at the Issuer level, not product level.

To improve the quality of care and successfully manage costs, successful Applicants will be required to participate in a Health Information Exchange (HIE) by December 31, 2025 with a goal of enhancing exchange of data along the patient, provider, hospital, and payer continuum. Covered California recognizes the importance of aggregating data across purchasers and payers to more accurately understand the performance of providers that have contracts with multiple health plans. Such aggregated data reflecting a larger portion of a provider, group or facility's practice can potentially be used to support performance improvement, contracting and public reporting. Contracted QHP Issuers must participate in the Integrated Healthcare Association's (IHA) Align.Measure.Perform (AMP) Programs to aggregate data by December 31, 2025. In this section, Applicants will be assessed on the extent to which clinical data exchange is occurring, plans to improve data exchange, and the extent to which they are engaging with other payers and stakeholders to support data aggregation.

15.8.1 Describe Applicant's efforts to improve the routine exchange of timely information and clinical data with providers to support the delivery of high-quality care, including participation in a Health Information Exchange (HIE). Applicant must address each of the following:

- Initiatives to improve the routine exchange of data to improve the quality of care, such as collecting clinical data to supplement annual HEDIS data collection and self-reported race and ethnicity identity.
- Any real-time or near real-time actionable data, such as pertaining to Emergency Department visits, the Applicant shares with providers.

16 Health Plan Proposal

All questions are required for all Applicants. All questions should be answered at the Issuer level, not product level.

Applicant must submit a health plan proposal in accordance with all requirements outlined in this section.

In addition to being guided by its mission and values, Covered California's policies are derived from the Federal Affordable Care Act, which calls upon the Exchanges to advance "plan or coverage benefits and health care provider reimbursement structures" that improve health outcomes. Covered California seeks to improve the quality of care while moderating cost, directly for the individuals enrolled in its plans, and indirectly by being a catalyst for delivery system reform in partnership with plans, providers, and consumers. With the Affordable Care Act and the range of insurance market reforms that have been implemented, the health insurance marketplace will be transformed from one that has focused on risk selection to achieve profitability to one that will reward better care, affordability, and prevention.

Applicant must submit a standard set of QHPs including all four metal tiers and a catastrophic plan in its proposed rating regions. The QHPs in the standard set must adhere to the certification plan year Patient-Centered Benefit Plan Designs. The same provider network type must be used for each QHP in the standard set of QHPs. Applicant's proposal must include coverage of its entire licensed geographic service area. Applicant may not submit a proposal that includes a tiered hospital, physician, or pharmacy network. Applicants must adhere to Covered California's standard benefit plan designs and the requirements in this section without deviation unless approved by Covered California.

Applicant may submit proposals including the Health Savings Account-eligible High Deductible Health Plan (HDHP) standard design. Health Savings Account-eligible plans may only be proposed at the bronze level in the individual exchange in accordance with the Patient-Centered Benefit Plan Designs. Additionally, Applicant may submit proposals to offer additional QHPs for consideration. The additional QHP offerings proposed must be differentiated by product or network.

The 2014 Payment Parameters rule preamble (78 Fed Reg at 15494) clarifies that an Exchange will be adequately enforcing the requirements of 45 CFR 156.420(b) if a QHP issuer limits the American Indian/Alaska Native (AI/AN) zero cost share plan variation to the lowest level QHP in a set of standard QHPs. (A set of standard QHPs refers to a collection of standard QHPs identical except for differences in cost sharing or premium.) Accordingly, Covered California requires Applicant to offer the lowest cost AI/AN zero-cost share plan variation in the standard set of QHPs. This requirement applies to both the standard Bronze Plan Design and the optional Bronze High Deductible Health Plan (HDHP). If the Bronze HDHP is offered at a lower premium than Applicant's standard Bronze plan, the zero-cost share AI/AN variation of the Bronze HDHP must be offered to consumers instead of the standard Bronze plan variation. The zero-cost share AI/AN Bronze HDHP variation Evidence of Coverage document should include language to the effect that this plan variation is not eligible for use in conjunction with a Health Savings Account (HSA) or other tax advantages. Applicant may not offer the zero-cost share AI/AN variation at the higher metal levels within the set of QHPs. However, Applicants offering

the additional QHPs, that do not include a Bronze Plan, must offer the AI/AN zero-cost share plan variation at the lowest cost in that additional set of QHPs. This requirement does not apply to the limited cost share AI/AN plan variation because the member cost sharing differs depending on the provider sought by the member. Limited cost share AI/AN plan variations must be offered for each QHP.

Applicant must cooperate with Covered California to implement coverage or subsidy programs, including those that complement existing programs that are administered by the Department of Health Care Services (DHCS). These programs include requirements in Welfare and Institutions Code 14102.

16.1 Applicant must certify that its proposal includes all four metal tiers (bronze, silver, gold, and platinum) and catastrophic for each health product it proposes to offer in a rating region. If not, Applicant must describe how it will meet the requirement to offer a product with all metal levels.

16.3 Preliminary Premium Proposals.

Final negotiated and accepted premium rates shall be in effect for coverage effective January 1, 2025. Premium proposals are considered preliminary and may be subject to negotiation as part of QHP certification and selection process. The final negotiated premium rates must align with the product rate filings that will be submitted to the applicable regulatory agency. Premium proposals must be submitted with the Application. Premiums may vary by geographic area, family size, and age as permitted by State law, including the requirements of State Regulators regarding rate setting and rate variation set forth at Health and Safety Code §§ 1357.512 and 1399.855, Insurance Code §§ 10753.14 and 10965.9, 10 CCR § 2222.12 and, as applicable, other laws, rules, and regulations, including, 45 C.F.R. § 156.255(b).

Applicant shall provide, in connection with any negotiation process as reasonably requested by Covered California, detailed documentation on Covered California-specific rate development methodology. Applicant shall provide justification, documentation, and support used to determine rate changes, including adequately supported cost projections. Cost projections include factors impacting rate changes, assumptions, transactions, and other information that affects Covered California-specific rate development process. Covered California may also request information pertaining to the key indicators driving the medical factors on trends in medical, pharmacy or other healthcare provider costs. This information may be necessary to support the assumptions made in forecasting and may be supported by information from Applicant's actuarial systems pertaining to Covered California-specific account. Applicant must confirm it will submit complete premium proposals for Individual products; the Unified Rate Review Template (URRT), the Supplemental Rate Review Template (SRRT), Actuarial

A number of the delivery system and payment strategy requirements in Attachment 1 meet the federal Quality Improvement Strategy (QIS) requirements.

The Patient Protection and Affordable Care Act (§1311(g)(1)) requires periodic reporting to Covered California of activities a QHP Issuer has conducted to implement a strategy for quality improvement. This strategy is defined as a multi-year improvement strategy that includes a payment structure that provides increased reimbursement or other incentives for improving

health outcomes, reducing hospital readmissions, improving patient safety, and reducing medical errors, implementing wellness and health promotion activities, and reducing health and health care disparities. QHP Issuers must implement and report on a quality improvement strategy or strategies consistent with the standard of section 1311(g) of the ACA.

If Applicants that are currently operating in Covered California have the same provider network for both the Individual Marketplace and the Small Business Marketplace, Covered California recognizes the responses may be the same or similar for both markets.

Applicants that are not currently operating in Covered California are not required to complete the QIS workplan updates as part of the Application for 2024 but must review Attachment 1 with the understanding that engagement in the QIS and Attachment 1 initiatives will be contractually required and measured in the future if Applicant contracts with Covered California.

All questions are required for all Applicants. All questions should be answered at the product level, not Issuer level.

18.4.1 Attachment 1 of the Covered California Qualified Health Plan (QHP) Issuer Contract embodies Covered California's vision for delivery system reform and serves as a roadmap to delivery system improvements. A number of the delivery system and payment strategy requirements in Attachment 1 meet the federal Quality Improvement Strategy (QIS) requirements.

The Patient Protection and Affordable Care Act (§1311(g)(1)) requires periodic reporting to Covered California of activities a QHP Issuer has conducted to implement a strategy for quality improvement. This strategy is defined as a multi-year improvement strategy that includes a payment structure that provides increased reimbursement or other incentives for improving health outcomes, reducing hospital readmissions, improving patient safety, and reducing medical errors, implementing wellness and health promotion activities, and reducing health and health care disparities. QHP Issuers must implement and report on a quality improvement strategy or strategies consistent with the standard of section 1311(g) of the ACA.

Applicants that are currently operating in Covered California are required to complete QIS workplans as part of the Application process. The following strategies meet the QIS requirements and Applicants must submit QIS workplans:

- Effective Primary Care
- Accountable Care Organizations (ACOs) and Integrated Delivery Systems (IDSs)

- Appropriate Use of Cesarean Sections
- Hospital Patient Safety

QHP certification is conditioned on Applicant developing a multi-year QIS and reporting year-to-year activities and progress on each initiative area.

If Applicants that are currently operating in Covered California have the same provider network for both the Individual Marketplace and the Small Business Marketplace, Covered California recognizes the responses may be the same or similar for both markets.

Applicants that are not currently operating in Covered California are not required to complete the QIS workplan updates as part of the Application for 2024 but must review Attachment 1 with the understanding that engagement in the QIS and Attachment 1 initiatives will be contractually required and measured in the future if Applicant contracts with Covered California.

Applicants offering certified QHPs in the Covered California Individual Marketplace may meet QIS requirements for proposed CCSB QHPs if the QIS applies to Applicant's proposed CCSB QHPs. Applicant attests that its QIS that meets Covered California requirements for the Individual Marketplace QHPs also applies to the proposed Small Business Marketplace QHPs.

If no, Applicant must complete a QIS workplan for Small Business Marketplace that describes a payment structure that provides increased reimbursement or other incentives to support one of the following: improve health outcomes, reduce hospital readmissions, improve patient safety and reduce medical errors, implement wellness and health promotion activities, and/or reduce health and health care disparities

Alternate benefit design proposals with preliminary rate information are due by the due date per Table 1.7 Key Action Dates. This strategy is defined as a multi-year improvement strategy that includes a payment structure that provides increased reimbursement or other incentives for improving health outcomes, reducing hospital readmissions, improving patient safety, and reducing medical errors, implementing wellness and health promotion activities, and reducing health and health care disparities. QHP Issuers must implement and report on a quality improvement strategy or strategies consistent with the standard of section 1311(g) of the ACA.
