## DESCRIPTION/GENERAL INFORMATION

This interface is designed to produce a monthly enrollment file for plan participants.

The data will be provided in a fixed-record length, ASCII file format. The layout contains both a Data layout (identified by a D in the Record Type field), as well as a Trailer record layout (identified by a T in the Record Type field).

Data will be provided in a monthly file that reflects the status as of the end of the month, i.e. a “snapshot” as of a point in time. For example, the project requires historical data from January 1, 2014 -current. IBM Watson Health will expect to receive one file for every month from January 1, 2014 to current. Each file will contain one record per member, per month. Ongoing file submissions would include one record for each member for the latest month only.

## DATA SUBMISSION

The data will be submitted to IBM Watson Health via SFTP on a monthly basis. Monthly files should be submitted on or before the agreed upon date of the month.

POPULATION OF DATA ONTO DEPENDENT RECORDS

For certain fields, e.g. Policy Holder ID we would like to have information copied down from the policy holder to the enrollee record. For others, e.g. Gender or Date of Birth, we would like the data to be specific to the person.

For each field, IBM Watson Healht has noted one of the three values below in the right-most column.

ENROLLEE-SPECIFIC (MEMBER SPECIFIC)	Information relevant to the enrollee (e.g. Date of Birth, Truven Health Analytics would like each enrollee’s date of birth). Please populate on each record with the information specific to that enrollee.
POLICY-HOLDER-ONLY (SUBSCRIBER ONLY)	Information relevant to the policy holder that IBM Watson Health would like on the contract holder, i.e. not copied onto the enrollee's records.
POLICY-HOLDER-SPECIFIC (SUBSCRIBER SPECIFIC)	Information relevant to the policy holder, but needs to be copied down to the enrollee. Please populate on each record with the information that has been copied from the policy holder.

## DESCRIPTION/GENERAL INFORMATION

This interface is designed to produce a medical claims file for plan participants administered through the data supplier.

The data will be provided in a fixed-record length, ASCII file format. The layout contains both a Data layout (identified by a D in the Record Type field), as well as a Trailer record layout (identified by a T in the Record Type field).

## DATA SUBMISSION

The data will be submitted to Truven Health Analytics via SFTP on a monthly basis. Monthly files should be submitted on or before the agreed upon date of the month following the close of each month.

## DENIED CLAIMS

Fully denied claims should be removed from the extract of claims prior to submission, while partially denied claims should be included. Truven Health defines denied claims as follows:

- **Fully denied claim** : The entire claim has been denied (typical reasons include an ineligible member, an ineligible provider, or a duplicate claims).
- **Partially denied claim** : The claim contains one or more service lines that are denied, but some that are paid. All service lines should be included on the file.

## DEFINITIONS

- **Fee-for-service claims:** Claims records for services that result in direct payment to providers on a service-specific basis.
- **Encounter records:** Utilization records for services provided under capitation arrangements (i.e., plans in which a provider is paid based on the number of enrollees rather than the services rendered.) These records enable documentation of all services provided regardless of whether or not direct payment was made to the provider.
- **Facility Data:** Facility data includes all services rendered by an inpatient or outpatient facility. The basis for the requirements of facility data is the information found on the standard UB-04 claim form.
- **Professional Data:** Professional data includes all services rendered by a physician or other professional provider, including dental, vision and hearing. The basis for the requirements of professional data is the information found on the standard CMS-1500 claim form.
- **Fee-for-Service Equivalents:** Financial amounts for services rendered under a capitated arrangement found within encounter records.

## DISCUSSION ITEMS

- If both fee-for-service claims and encounter records are included on the data file, Truven Health will rely on the data supplier to explain how to differentiate them, preferably using the field Capitated Service Indicator.
- If encounter records contain fee-for-service equivalents, it is essential for Truven Health to understand which fields contain these amounts.
- Financial fields should be populated at the service line level, not at the claim level.
- Truven Health will need to understand the circumstances under which claims are not paid on a line item basis. For example, situations where claims are paid on a per diem basis or paid based on a DRG. It is our preference if the supplier can apply a factor so that the financials are spread across the lines based on the service rendered.

*Claim is paid based on the DRG and Net Payment for the entire claim is \$3,632.00; financials are applied across lines*

CLAIM LEVEL INFORMATION				SERVICE LEVEL DETAIL				
Claim Id	Provider Id	DRG	Provider Type	Line Number	Revenue Code	Service Count	Allowed Amount	Net Payment
11111	121212121	177	25	1	120	2	\$ 2,500.00	\$ 2,000.00
11111	121212121	177	25	2	250	1	\$ 115.00	\$ 100.00
11111	121212121	177	25	3	720	10	\$ 1,800.00	\$ 1,532.00

- If the managed care program includes a risk-sharing arrangement with providers such that a portion of the approved payment amount is withheld from the provider payment and placed in a risk-sharing pool for later distribution, then the withhold amount should be recorded as a separate field and also included in the Charge Submitted, Allowed Amount and Net Payment fields.

## Medical Functional Specifications for File Layout

### DISCUSSION ITEMS - PROVIDER

- Truven Health requires unique provider identifiers and associated names. Truven Health would like both the identifier and the name to be specific to each provider, rather than group level information. TAXID is preferred for the identifier.
- If providers within group practices use a single TAXID, Truven Health would prefer an additional qualifier that would make each identifier and name unique.
- If only the group name is available with the associated TIN, and a qualifier is not available, Truven Health prefers another identifier for professional claims and the TAXID for the facility claims. NPI is preferred for the alternate identifier. In this case the TAXID is still requested in addition to the NPI or alternate identifier.

#### Provider Example 1

When providers in group practices use the same TAXID, a qualifier is needed to insure unique provider names.

Claim ID	TAXID	Qualifier	Provider Name	Prov Type	Service Count	Net Payment
11111	121212121	2222	Dr. Brown	25	2	\$ 2,000.00
22222	121212121	3333	Dr. Smith	35	1	\$ 100.00

#### Provider Example 2

The following is an example of what is not desired.

Claim ID	TAXID	Provider Name	Prov Type	Svc Count	Net Payment
11111	121212121	Dr. Brown	25	2	\$ 2,000.00
22222	121212121	Dr. Smith	35	1	\$ 100.00
33333	232323232	XYZ	25	1	\$ 125.00
22222	232323232	XYZ	35	1	\$ 110.00

#### Provider Example 3

When only the groups name is available with TAXID, NPI is requested in addition to TAXID.

#### Professional

Claim ID	TAXID	Group Name	NPI	Prov Name	Prov Type	Svc Count	Net Payment
11111	121212121	XYZ Pediatrics	2222222222	Dr Brown	25	2	\$ 2,000.00

## FINANCIAL RELATIONSHIP

Truven Health defines the relationship among financial fields as follows. Those marked with an asterisk are desirable, but not required for the data extract.

## CORRECTIONS TO PAID CLAIMS

Data suppliers generally use either Void/Replacement or Adjustment records to make corrections to paid claims. Truven Health defines these as follows:

### VOID/REPLACEMENT

A **void** is a claim that reverses or backs out a previously paid one. All financials and quantities are negated on the void record. A replacement record that contains the corrected information generally follows it. The original, void and replacement need not appear in the same file.

*After adjudication, a paid claim with a \$25 Copay and \$50 Net Pay, a correction was necessary. The correction contains a \$10 Copay and \$65 Net Pay.*

Record Type	Svc Count	Charge Submitted	Copay	Deductible	Net Payment
Original	1	\$ 75.00	\$ 25.00	\$ -	\$ 50.00
Void	-1	\$ (75.00)	\$ (25.00)	\$ -	\$ (50.00)
Replacement	1	\$ 75.00	\$ 10.00	\$ -	\$ 65.00

### ADJUSTMENT

A financial **adjustment** is a claim line where one or more of the financial fields display the difference between the original amount and the final amount. Any financial not being adjusted should be zero. All quantities should be zero on the adjustment as well. The original and adjustment need not appear in the same file.

*After a claim was adjudicated with a \$25 Copay and \$50 Net Pay, it was discovered that there should have been a \$10 Copay and \$65 Net Pay.*

Record Type	Svc Count	Charge Submitted	Copay	Deductible	Net Payment
Original	1	\$ 75.00	\$ 25.00	\$ -	\$ 50.00
Adjustment	0	\$ -	\$ (15.00)	\$ -	\$ 15.00

## FACILITY RECORD CONTENT

- The standard UB-04 claim form contains both information that pertains to the entire claim and single service/procedure within the claim.
- Each record in the data file should represent one service (detail) line.
- All financials and quantities on each record should pertain to that service only (as opposed to the entire claim).
- The repeating of non-quantitative claim-level information (e.g., Claim ID, Provider ID, Provider Type, etc.) on each record is necessary.

### *One facility claim with three service lines*

CLAIM LEVEL INFORMATION			SERVICE LEVEL DETAIL			
Claim Id	Provider Id	Provider Type	Line Number	Revenue Code	Service Count	Net Payment
11111	121212121	25	1	120	2	\$ 2,000.00
11111	121212121	25	2	250	1	\$ 100.00
11111	121212121	25	3	720	10	\$ 1,532.00

## PROFESSIONAL RECORD CONTENT

Truven Health does not store separate header/claim-level and detail/service-level information for professional claims. Truven Health requires the following:

- Each record in the data file should represent one service (detail) line.
- All financials and quantities on each record should pertain to that service only (as opposed to the entire claim).
- The repeating of non-quantitative claim-level information (e.g., Claim ID, Provider ID, Provider Type, etc.) on each record is necessary.

### *One professional claim with two service lines*

CLAIM LEVEL INFORMATION			SERVICE LEVEL DETAIL			
Claim Id	Provider Id	Provider Type	Line Number	Procedure	Service Count	Net Payment
13331	621262121	51	1	99201	1	\$ 100.00
13331	621262121	51	2	99175	1	\$ 150.00

## DESCRIPTION/GENERAL INFORMATION

This interface is designed to produce a prescription drug claims file for plan participants administered through the data supplier.

The data will be provided in a fixed-record length, ASCII file format. The layout contains both a Data layout (identified by a D in the Record Type field), as well as a Trailer record layout (identified by a T in the Record Type field).

## DATA SUBMISSION

The data will be submitted to Watson Health Analytics via SFTP on a monthly basis. Monthly files should be submitted on or before the agreed upon date of the month following the close of each month.

## DEFINITIONS AND DENIED CLAIMS

Prescription drug data are claim records for services that result in direct payment to a pharmacy on a service-specific (for example, prescription-specific) basis.

If the managed care program includes a risk-sharing arrangement with providers such that a portion of the approved payment amount is withheld from the provider payment and placed in a risk-sharing pool for later distribution, then the withhold amount should be recorded as a separate field and also included in the Charge Submitted, Allowed Amount and Net Payment fields.

Fully denied claims should be removed from the extract of claims prior to submission, while partially denied claims should be included. Watson Health defines denied claims as follows:

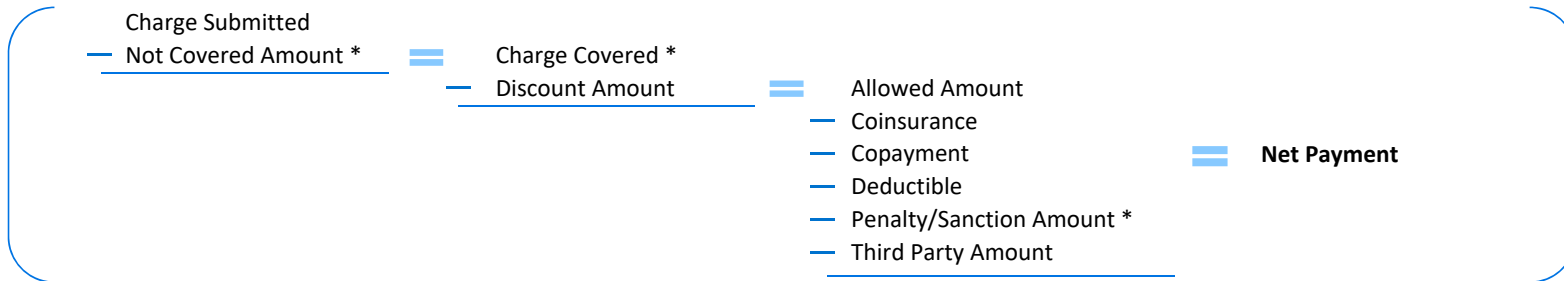

- **Fully denied claim** : The entire claim has been denied (typical reasons include an ineligible member, an ineligible provider, or a duplicate claims).
- **Partially denied claim** : The claim contains one or more service lines that are denied, but some that are paid. All service lines should be included on the file.

## FINANCIAL RELATIONSHIP

Watson Health defines the relationship among financial fields as follows. Those marked with an asterisk are desirable, but not required for the data extract.

## CORRECTIONS TO PAID CLAIMS

Data suppliers generally use either Void/Replacement or Adjustment records to make corrections to paid claims. Truven Health defines these as follows:

### VOID/REPLACEMENT

A **void** is a claim that reverses or backs out a previously paid one. All financials and quantities are negated on the void record. A replacement record that contains the corrected information generally follows it. The original, void and replacement need not appear in the same file.

*After adjudication, a paid claim with a \$25 Copay and \$50 Net Pay, a correction was necessary. The correction contains a \$10 Copay and \$65 Net Pay.*

Record Type	Svc Count	Charge Submitted	Copay	Deductible	Net Payment
Original	1	\$ 75.00	\$ 25.00	\$ -	\$ 50.00
Void	-1	\$ (75.00)	\$ (25.00)	\$ -	\$ (50.00)
Replacement	1	\$ 75.00	\$ 10.00	\$ -	\$ 65.00

### ADJUSTMENT

A financial **adjustment** is a claim line where one or more of the financial fields display the difference between the original amount and the final amount. Any financial not being adjusted should be zero. All quantities should be zero on the adjustment as well. The original and adjustment need not appear in the same file.

*After a claim was adjudicated with a \$25 Copay and \$50 Net Pay, it was discovered that there should have been a \$10 Copay and \$65 Net Pay.*

Record Type	Svc Count	Charge Submitted	Copay	Deductible	Net Payment
Original	1	\$ 75.00	\$ 25.00	\$ -	\$ 50.00
Adjustment	0	\$ -	\$ (15.00)	\$ -	\$ 15.00
