

Learning Management System (LMS) Single Sign On (SSO) in Enroller Portal

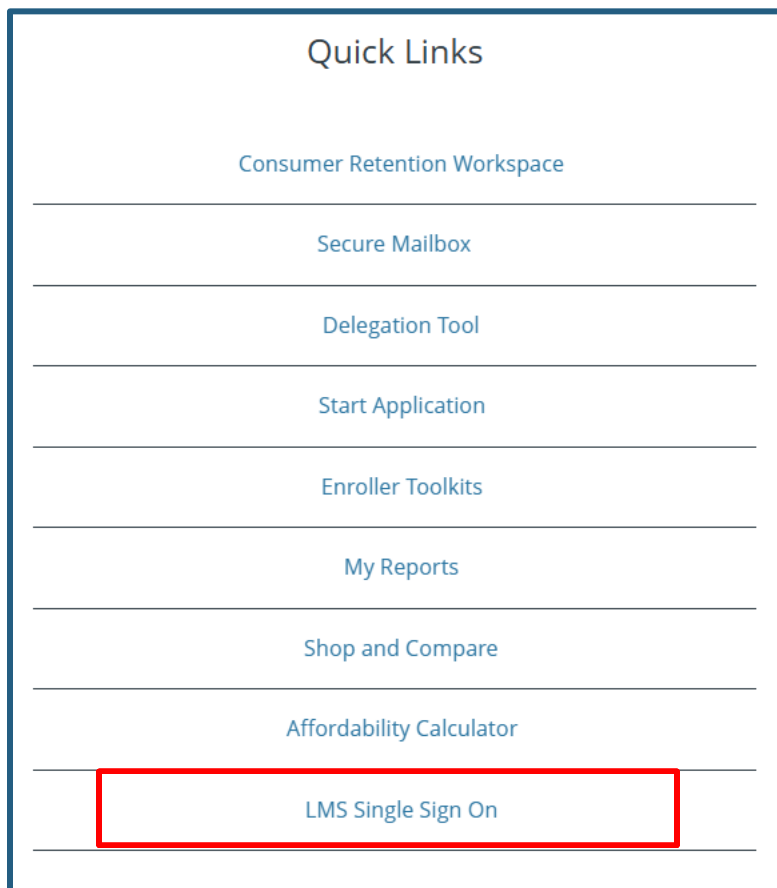

Overview

This guide explains the navigation to the LMS Single Sign On link in the Enroller Portal.

A single sign-on (SSO) link is available in the Enroller Portal so enrollers can easily navigate to the Learning Management System (LMS).

The **LMS Single Sign On** button is located at the bottom of the *Quick Links* section.

This link is available to all enrollers.

Clicking on the link will lead the user to their LMS dashboard.

The dashboard will include mandatory trainings along with their due dates in addition to available E-Learning modules to select.

Learning Management System (LMS) Single Sign On (SSO) in Enroller Portal

Highlights

- **Faster access to training:** Enrollers can open the LMS directly from the Enroller Portal with one click, without a separate LMS login.
- **Less password trouble:** SSO reduces the need to remember multiple usernames and passwords and helps cut down on password reset issues.
- **Better user experience:** It creates a more streamlined, seamless path from the portal to training, reducing confusion about where to go and how to log in.
- **Supports onboarding and recertification:** SSO can help accelerate onboarding and annual recertification by automatically creating LMS accounts from existing portal/Salesforce data and granting access with fewer manual steps.
- **Reduces duplicate work:** Using existing portal/Salesforce information means less repeated data entry and less duplicate account management.
- **Improves visibility and compliance:** Training and certification status can be synced back to Salesforce, giving admins and enrollers one up-to-date view of progress.
